Student COVID Protocols

Student Responsibilities and Behavioral Guidelines

What affects one of us, affects all of us, especially in this environment. You must do your part to keep our community safe.

WHILE ON CAMPUS YOU MUST:

- Wear an appropriate face covering (mask) at all times.
- Practice good personal hygiene consistent with public health protocols, such as frequent hand-washing for 20 seconds, appropriately covering coughs and sneezes, use of hand sanitizers before and after leaving campus buildings, and wiping down surfaces yourself when arriving at and upon leaving a communal or community space.
- Be in physical attendance *only* on your cohort day, follow campus drop-off procedures and respect directional signs on pathways and in buildings.
- Whenever feasible, maintain a distance of 6 feet between yourself and any other person.
- Respond cooperatively and respectfully to reminders that you follow these protocols.

AT HOME YOU AND YOUR FAMILY MUST:

- Avoid large gatherings and environments in which people are not observing recommended behaviors, such as wearing masks and practicing physical distancing.
- Remain at home and notify an appropriate adult if you experience COVID-19 symptoms.
- Follow instructions if you or someone in your home tests positive for COVID-19 and is required to isolate, or if you learn that you have come into close contact with someone who has tested positive for COVID-19 and are required to quarantine.
- Seek testing for COVID-19, as directed by the School or San Francisco Department of Public Health and participate in San Francisco Department of Public Health's contact tracing program as requested and share complete information with contact tracers about others who may be exposed.
- Strongly consider receiving a seasonal flu vaccination this fall.

Notifying the School of a Positive COVID Case

You must email Carol Coles (carol.coles@sfuhs.org) and copy Julia Eells (julia.eells@sfuhs.org) and Alexandra Simmons (alexandra.simmons@sfuhs.org). The school and the DPH will conduct

contact tracing interviews of the infected student and contact direct contacts, who will be asked to quarantine and test. (This process will likely take 1-2 days.) The school will send a community-wide notification of a positive case.

We will never share identifying information about community members who have tested positive and ask that you avoid presumptive conversations.

Notifying the School of Breaking of Social Distancing Protocol

If you see something, say something. It is only through community vigilance that we can maintain the safety of our teachers, staff, students, and students' families.

If you have evidence or suspicion that another student is breaking social distance protocol, please follow these steps:

- Remind the student of the social distancing protocols.
- Tell a trusted adult or dean, who will follow up with the student.
- If the act is egregious or repetitive, the school will ask the student not to return to campus for an appropriate length of time.
