	<b>Topic</b>	<b>Comments</b>
1	Aging Schools	I think the district should do a cost/benefit analysis before fully replacing an aging school. Most commercial entities and homeowners will do a "to the studs" remodel when they need to do a major upgrade. My bet is that you could accomplish upgrading a school (and possibly adding a second floor for additional space) more cheaply with a major remodel. Also, the high ceilings in, for example, the LWHS lunchroom are pretty, but why not make future similar spaces two story to accommodate growth? I think parents could live with a school that may not make the cut for Architectural Digest. :-)
2	Aging Schools	This district has recently been replacing buildings that are less than 50 years old. Most districts in the state utilize their school buildings for 100 years. I am a teacher in the school district, a property owner in the district, and a parent of two students in the district. While we have benefited from new facilities, they were not required and they did not significantly improve learning. This is an inappropriate stewardship of taxpayer money.
3	Aging Schools	Please create a long term roadmap for replacing every school built before 2000 or about then.
4	Boundary	- We should reboundary as much as possible as this is most cost effective as keep asking tax payer for bond has its limitations. - We can arrange lots of short term projects like refurbish or expand from June to August to limit the impact to existing students. - For preschool space, can we rent from churches, library, community centers, or YMCA that do not get much use during the middle portion of weekdays? - To save cost, school gym or sports fields can be rented out to non-youth related community event when no students are on site so the income can be used
5	Boundary	Can the district look into changing district boundaries with neighboring districts? If LWSD is growing so quickly, it would make sense to change boundaries with a district that isn't growing so quickly so schools are utilized well. I know this is a big thing to ask, but please consider this. If we don't get the money needed through levies and bonds for more schools or expanding schools, then boundaries should be changed. Also, I don't think it is as safe to have too many students in one school, especially high school level.
6	Boundary	Looks like some re-boundary work or program redistribution would be good in the corner of Sandburg/Thoreau/Juanita/Keller to more evenly distribute there. A smaller project that wouldn't take a lot of resources...
7	Boundary	Reboundary highschool feeding area to spread out the the Capacity Shortfall.
8	Boundary	Redraw enrollment boundaries - currently Alcott boundary doesn't make sense. It includes Woodbridge, but there are two other closer elementary schools! This is ridiculous causing extra expenses (busing) and over crowding at Alcott.
9	Capacity	Build new schools
10	Capacity	Always build 2 and 3 story school buildings

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

11	Capacity	Aging elementary schools that need rebuilt are already on the list - but they need to be moved to the top. Currently elementary students at some of these schools have to travel out a portable, down a path, over the playground and through locked building doors to get to the lavatory. Those two seat lavatories serve 12 portables, a gym, music room, lunch service area and 4 - 4th grade classrooms. I'm sure there is a building code for a certain number of lavatories and number of persons using them that this situation does not comply with. Not to mention not enough lavatories for staff. Some classes are being held in rooms that were designated for teacher planning and storage. Special needs students have their lessons in former storage areas. Staff have offices in what were former phone booths. This has gone on for far too long and needs to be addressed. You cannot put portables down on a playground or play field and call it good. The number of people exceeds the ability for the facility to be adequate in more ways than space. Please rebuild elementary schools first. When you do - please consider consulting the current staff and community PRIOR to creating the plans for the building. Architects know what looks good, but often our elementary schools are lacking in functionality due to what looks good... We need these buildings to stand the test of time and work for students, parents, teachers and staff.
12	Capacity	All your data, numbers and predictions are pre-covid. Given tech companies are letting employees work from home permanently, there is a huge unknown on how this will impact enrollment at LWSD in the future. Also, some students seem to love online learning. This could be rolled out to students that opt in for online only, in a far more economical way than traditional school buildings.
13	Capacity	Consider an option to have student do hybrid or at home classes to mitigate capacity in middle and high school.
14	Capacity	Evergreen elementary from portables to permanent, expand tesla stem
15	Capacity	Every elementary school should have space added/allocated for preschool (NOT in a portable).
16	Capacity	Expanded space for commons/cafeterias in schools that cannot house many students (Redmond EI commons can only seat 130 of 670 kids at one time) and ensure covered play spaces for ALL elementary schools.
17	Capacity	For Middle schools, if the overcrowding is most in Redmond Middle and Rose Hill and least in Kamiakin, why is the decision to expand Kamiakin. That makes no sense from the overcrowding perspective. Also, if we are adding (and have added in the near past) elementary schools, doesnt it make sense to add new Middle school (and perhaps a new High school) in the densest part of the district.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

18	Capacity	For the love of MATH, please use more advanced timescales/improve your population projections. We've been a LWSD family since 2004 and we've watch new school after new school built, only to have the pods converted to classrooms, and portables placed in the school yards in a few short years. (LWHS, RHMS, Ben Rush, ...) We clearly need to consider either a longer time frame or update the models because it is unconscionable that a two-year old expanded elementary school should have to convert their library and pods to classrooms and build 4 portables. It took longer than two years to rebuild the school!!! AND - while the elementary schools clearly have the worst capacity shortages, those little kids are going to grow up and go to middle school and high school. Please don't neglect the senior/middle schools. Those kids will need to go somewhere.
19	Capacity	High schools like RHS are already extremely crowded and need extra seats immediately. Do whatever you can to secure additional space or build choice high schools in the most overcrowded learning communities first. The priority should be adding new choice high schools in Redmond (perhaps one with a humanities focus rather than STEM) to meet both need and demand, as Kirkland already has several choice school options. While both areas are growing, it is inequitable to offer the majority of choice schools in one learning community only. Redmond has faced overcrowding for too many years already, with no real solutions. Please Note: None of my friends have seen a word about this survey opportunity. Can all schools send it out at least a week before the comment deadline? If all feedback is online, you should be working extra hard to get the word out via email and school newsletters.
20	Capacity	I live in Redmond Union Hill. Consider building brand new large elementary school near Woodbridge neighborhood and Redmond Hill Apartments, wreck Alcott Elem, take Alcott's land and enlarge Tesla Stem to alleviate Redmond HS and Eastlake HS. This helps Redmond Elem capacity, addresses Alcott's aging facility, and helps Redmond HS and Eastlake HS capacities. A crazier option: wreck Alcott, rebuild Dickinson to accommodate both Dickinson and Alcott (I believe Dickinson has possibly the largest acreage for an elementary school), and expand Tesla Stem on Alcott's site. This addresses Alcott's aging facility and helps Redmond HS and Eastlake HS capacities. Lastly, with all the new housing going up in downtown Redmond, it makes sense to enlarge or rebuild Redmond Elementary. This keeps getting passed by and I don't know why. Redmond Elementary serves a huge geographical area, all the way to Idylwood Park! My first proposal works well with this.
21	Capacity	I think schools that have capacity issues as well as are an aging facility need to be the priority.
22	Capacity	I think you need to prioritize capacity issues regardless of if you already have land. LW area and Redmond area will need to be proritized to have enough space, especially at the elementary level.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

23	Capacity	I would like to prioritize schools with capacity issues that can be enlarged and have available land that can be used more efficiently and at a lower cost. However, when you are planning for this you need to take into consideration the common areas that students use for lunch, PE, recess, library, etc. In the past this has not been addressed and has caused less crowding in the classroom but severe, difficult and extremely inconvenient problems with spaces for specialists, lunch, recess and even passing in the hallways.
24	Capacity	Instead of building more space, have schools in 2 sessions- morning and afternoon so one set of students attend 7.30am to 12.30pm, second group attends 1pm to 6pm. Have a hybrid model where students are home one day a week so the same school space is used by many different students/classes
25	Capacity	majority due to expand of student population & need capacity ...
26	Capacity	Only place I can find to comment in general -- not sure what regulations may prevent us from doing so, but build bigger schools in the first place! It has been disappointing and frustrating to hear about portables being added to schools that have JUST been rebuilt. Build the original school larger in the first place. I have NEVER heard of a school saying "we just have too much space". However we frequently hear about lack of space, not enough classrooms, wanting bigger gyms, overcrowding, etc. This seems to be common sense - the growth is no longer "unprecedented" as it seems the district loves to claim when describing needs for funds or new space. Parents have said this for years in the community (I've had kids in schools here for about 18 years now): Build larger original buildings!!! Ones that are not already out of space before construction is even finished!!!
27	Capacity	Put money where there is the greatest need in the district for capacity first and then aging schools.
28	Capacity	The schools that have been rebuilt (such as Peter Kirk) should have DOUBLE the capacity they have. Add an extra level, use the land, stop spending money on making them look like opera houses. I mean I appreciate good architecture, but focus on CAPACITY first. Otherwise we keep spending money every couple of years. And another thing: how do you dare say "aging" and "capacity" in the same breath? Please separate the two!!! Don't assume people who care about capacity also care about aging. You're insulting us and the tax money you get from us.
29	Choice Schools	2 concerns- I think the money should be spent on technology and finding new and more innovative ways to learn rather than just increasing the sizes of schools. Also, building new choice schools seems like spending a lot of capital on a lower number of students. Its seems unfair. It would be better to improve the standard learning options at the normal schools rather than providing a bunch of resources to individuals that "win the lottery".

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

30	Choice Schools	A choice school could be put in the Juanita area whether it be elementary, middle or high school. It would address some capacity/aging issues, but more importantly, this area does not have any choice schools except EAS. Is this fair to the Juanita area students? Or, should I say it bluntly, is it discriminatory? Also, what about expanding the enrollment of choice schools in general. With the 2nd largest district in the state, why is our choice school enrollment is so, so small? The percentage of the district's students attending these schools is tiny compared to what our district's students could be given the opportunity to attend. Why do these schools have to be so small? Why not make them the size of regular schools? Let's make our district incredible! Thirdly, what about adding other immersion schools? Personally, I feel that all of our elementary schools should be immersion. Look at other countries. We are one of the only countries who do not teach their children other languages from the get go. It's frankly embarrassing.
31	Choice Schools	Build a Choice School Campus for the 4 middle school choice schools in a semi-centralized location in the district. This would alleviate capacity issues at both Finn Hill and Rose Hill Middle, would get Renaissance out of portables and off of a high school campus (which would free up the portables for other uses), and would get Northstar off of a high school campus. I would also recommend offering choice schools the option to expand, which there is high demand for in the community. The opportunity to expand could be captured if building a middle school Choice School Campus or if the choice school is relocated to another campus (which is in the FAC's recommendations for Stella and/or EAS). I know Stella has a strong interest in expanding from 90 to 180 (over a three-year process).
32	Choice Schools	Build additional choice schools that address the demand in the school district. The neighborhood school does not sufficiently address the student needs - given the lottery and %students who prefer a choice school.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

33	Choice Schools	Develop a hybrid system. Design and test models that rotate home and facility programs. Use Khan Academy and augment with tutoring and inperson guidance. Stop wasting money on trying to develop a new wheel. Plug and play known solutions. Start with the end in mind (create capable and competent adults with opportunities in life). Address through-put / choke point challenges with an employee driven red flag system for any at risk or challenged students. Spend money on solving throughput issues not a physical education empire (huge administration). Every time I help my kid with Khan Academy, it makes me wonder about financial incentives to decision makers for not utilizing this fantastic and free resource. System feels horse and buggy with egos attached to failing cobbled together/disjointed solutions. The new high tech community that is moving in will demand more. Choice schools are where everyone wants their kids. Are you completely numb? Make everything into smaller choice school designs, which are most successful and desired. A hybrid design with khan Academy. "Choice" is a flipping joke of a label. There is no choice involved. The wait list is in the thousands. You guys are totally missing it, and what really sucks is that the families and kids are worse off.
34	Choice Schools	Expand choice middle school capacity due to high demand.
35	Choice Schools	It seems clear that you could alleviate overcrowding at LWHS by changing attendance boundaries. Ideally, you would move the boundary slightly south on the west side of 405 below Forbes Creek and then draw east. Why wouldn't you do that if JHS has projected capacity and the other neighboring school is over capacity? So easy to do. Secondly, yes, refurbish the pool at Juanita. All of the schools use it for swim meets and practices. It's really a resource for all. Popular Choice schools. Juanita Cambridge is the very best model where you co-locate a choice program with a full line high school. It provides the accelerated academics, social diversity, athletics and all the rest of the enrichment opportunities under one roof. You should expand choices schools but, if you do, just build a new high school for all and co-locate the choice school there like at Juanita. Disclosure: We are in the LWHS boundary and attend Juanita HS for Cambridge International.
36	Choice Schools	More choice schools!
37	Choice Schools	More choice schools. The Middle School choice lottery is almost impossible to get in to.
38	Choice Schools	New choice school in redmond New school to manage redmond high
39	Choice Schools	Please, please, please when you build choice high schools, make them for our students that are struggling in high school, not the ones that are going to be successful- we need tech prep, or career prep schools for students that are looking for jobs after high school. Those are the students that have the greatest need.
40	Choice Schools	Smaller choice schools close to each area

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

41	Choice Schools	Stem school should be increased in size when there are so many students who apply and do not get it.
42	Choice Schools	There are too many students in high schools of our district, so the additional choice high schools are needed urgently.
43	Choice Schools	When choice high schools are built- STOP building schools for our most academic students. What we really need are career prep high schools for our students that struggle!
44	Choice Schools	Strongly Agree - LWSD is facing great issues in addressing to rising number of students in the school district. Strongly Disagree - Increasing school capacity as a well thought solution. Issues that need to be addressed - 1. Student : Teacher ratio need to be maintained. There is an overload of students and the current learning model does not sufficiently address the need to have smaller classroom setup and support it with smaller student:teacher ratio. 2.Online learning option for students should be made available. Most of the proposed student rise can be met with supplementing a new mixed learning model with both online and in person classes. This is especially a viable option for middle school - high school students. Building new buildings or talking about expansion plan in this uncertain world especially with COVID crisis sounds somewhat unappealing. 3. Virtual Schools - Please do address the possibility of making virtual school or online school added as an option to the school district's plan to address increase in student population. This can be set up almost immediately without expensive million dollar solutions in infrastructure. 4. Insufficient STEM Choice Schools - With so many IT companies like Amazon, Facebook, Google, Microsoft, SpaceX, Nintendo, and many more having presence in the Eastside region - it makes sense to include more choice schools offering niche skills that meets the demands of the skill sets that these companies require in the years to come. By not addressing this important issue, we would see that our children would lose out precious time and also the opportunity to excel in these fields. A classic example is in the demand - supply issue when it comes to admission to the TESLA STEM HIGH in LWSD. It's such a pity that only one such school is available in the entire LWSD region, denying many children the opportunity to focus in the STEM programs. (Please look up at the application rate to the acceptance rate) It is even more painful to note that students of merit lose opportunities to gain admission because of the randomized "lottery" process. It's akin to Ivy League Universities conducting a lottery process to determine if a student be admitted into their undergrad programs.
45	Early Learning	Build a early learning center an free elementary classroom space. Make new elementary school a choice school.
46	Early Learning	build a regular high school in LWSD that has a pre school on premises that could be used to teach early childhood classes as well as provide childcare for teen and teacher/staff children.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

47	Early Learning	Build space in Rachel Carson Elementary for Preschool to move into the building. Right now preschool is in portables that do not support the needs of the students. Preschool needs more space in the classroom, accessible entry ways, and a bathroom and changing table in the classroom. The portable does not provide any of these fundamental needs for the preschoolers.
48	Early Learning	If preschools are moved out of elementary schools where will they go??
49	Early Learning	It is great to see the addition of early learning centers in the Lake Washington and Juanita Learning Communities. Please consider adding an Early Learning Center to the Eastlake Learning Community. Please consider purchasing & remodeling existing community buildings/sites that could also accommodate partnering with community daycares/preschools that could provide truly inclusive settings for early childhood classes.
50	JHS - Pool/ Fieldhouse	The community needs and deserves an aquatic center so definitely put funds towards repairing the Juanita pool. It seems that very little attention is being given to the Juanita Area in terms of Finn Hill. This is problematic as we are growing rapidly as seen with housing and traffic. Please plan for that! Students and teachers belong in classrooms with adequate sanitary stations and bathrooms nearby. No adequate handwashing can be done in portables! Either purchase portables with bathrooms and sinks or build more schools in general to alleviate class sizes being too large and students/teachers being stuck in portables with no easy access to restrooms. Priority needs to be reducing portable use at the elementary level. Remove early childhood from elementary, especially from overcrowded elementary schools to free up classroom space. Create space for early childhood elsewhere and get the state to fund it for ALL students, not just low income or kids with disabilities. They need to stop "consulting" and start spending money on actually funding this. Nothing ever changes in this regard and it's very discouraging to see as we know that early childhood is a pivotal part of a student's academic career. Remove choice schools as they don't serve the whole public school community but do take funding. Make it more fair but getting rid of them!
51	JHS - Pool/ Fieldhouse	A new swimming pool at Juanita Highschool and a swimming pool for Lake Washington High School
52	JHS - Pool/ Fieldhouse	Don't mess up the size of Juanita's field house. Leave the interior size alone and update the building to be a safe learning environment, ie. updated building structures, adequate lighting and painting.
53	JHS - Pool/ Fieldhouse	Give Juanita a new fieldhouse before it is deemed non operational!
54	JHS - Pool/ Fieldhouse	Hardwood floors in the Juanita field house on all courts.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

55	JHS - Pool/ Fieldhouse	It feels like the JHS Fieldhouse , Kamikain MS and Rockwell Elementary are desperately in need of updating or replacement due to their age.
56	JHS - Pool/ Fieldhouse	JHS fieldhouse & Kamiakin school...because they are both the oldest in the district and falling apart!!
57	JHS - Pool/ Fieldhouse	JHS Fieldhouse needs to get prioritize , this is only right size indoor pool in whole Kirkland and Redmond area, served not only highschoolers but also the kirkland redmond community. it is ashamed in this expensive area there
58	JHS - Pool/ Fieldhouse	Juanita Fieldhouse it's an old archaic building it feels like you stepped into Alcatraz prison yard. A rubble wasteland and an abandoned broken down pool. You only have one bathroom stall in the boys locker room it's a dungeon.
59	JHS - Pool/ Fieldhouse	Juanita Field House, Football and baseball fields should be updated
60	JHS - Pool/ Fieldhouse	Juanita High Fieldhouse and pool - these could be fantastic facilities...and probably were in the 60's. They are so out of date and run down, it is a stark contrast to the rest of the new Juanita High campus. They seem barely functional.
61	JHS - Pool/ Fieldhouse	Refurbish and rebuild the Juanita Pool and Field House. This is the ONLY public pool in Kirkland that is open year round. It is one of three pools on the eastside for a growing sport of swimming.
62	JHS - Pool/ Fieldhouse	Refurbish JHS Pool
63	JHS - Pool/ Fieldhouse	Refurbishment of swimming pool, pool deck, pool locker rooms and field house locker rooms, training, weight and mat rooms. Facility was built in 1971. Swimmingpool needs upgrade to prevent complete failure/shut down. Inglewood Middle school is overpopulated and the school itself needs refurbishing and upgrade.
64	JHS - Pool/ Fieldhouse	The JHS Fieldhouse really needs to be updated, especially now that the new building is done it looks very outdated next to the new building.
65	JHS - Pool/ Fieldhouse	I recommend placing a high priority on the Juanita Pool/Fieldhouse Improvements. The "extra" money from the Juanita High Replacement should have gone toward this project. That pool/fieldhouse gets a lot of use and brings in money for LWSD. The outside use also brings in money to local businesses which then gets passed along to LWSD through tax money. With more and more businesses/jobs either leaving Puget Sound and/or businesses deciding

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

66	JHS - Pool/ Fieldhouse	It is sad and scary to see all the money you are putting into this when many families are struggling with online learning. It is time for a change. When covid is over why not offering online school. Why not create a special department for that. Why not building more recreation facilities with a swimming pool and all the amenities like JHS fieldhouse. You need to think outside the box, life has changed and it won't be the last covid. Thanks for reading
67	JHS - Pool/ Fieldhouse	Juanita HS Fieldhouse AND UPSTAIRS areas (*not* pool) Roof is leaking & needs fixed The training facility (both rooms) are out-dated & in disproportionate to other district athletic & PE training areas. (equity?)
68	JHS - Pool/ Fieldhouse	Please please refurbish JHS field house and pool. The community needs both so much.
69	Other	If it's absolutely necessary to have portables, can you please have drinking water available to the students/teachers..
70	Other	Make buildings cool and make school lunches better
71	Other	The district is too large and wide spread. Might be time to consider splitting the district into 2 or 3 smaller districts. It's difficult to address the needs of such a large district.
72	Other	Updated technology , common spaces, added bathrooms for several portables, open learning areas for grade levels to collaborate. Same kind of spaces for teachers. Large schools need a gym that does not combo as a cafeteria. If students eat in classroom, a different floor than carpeting. not sanitary! Staff restrooms in more than one location. Two stalls for a staff of over 60 women, not sanitary!
73	Planning	Why does it cost 11 Million to construct 8 new classrooms? It just seems like it is way too much money
74	Planning	Be innovative and look at urban schools
75	Planning	Buy new land to allow for further expansion for growth. Work with cities to have developers earmark some available land for school districts like they do for parks. It is ridiculous that all these houses are allowed to be built
76	Planning	With COVID, we do need to keep in mind that dealing with aging conditions and capacity needs to be dealt with before the issue arises. Need to have plans on how to stay up on maintaining building to meet the health needs.
77	Planning	Yes. Have the LWSD place somebody full time in the City of Kirkland permit office to track how many housing/building permits they are handing out. Until you do this your school capacity planning will always be reactive and 5-10yrs late.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

78	Planning	It makes sense to build new choice schools, both Middle and High School that align with the career aspirations of students and the rising market demand. Do convert aging elementary schools into pre schools and invest funds into new schools. Instead of expanding the new elementary schools please add new schools closer to community to reduce commute time for the children. For instance if you would take the communities living in our area in South East Redmond - namely Redmond Hill, Evans Creek, Vesta Apartments and Woodbridge (and a new community planned nearby) there is no elementary / middle / high school at walking distance. It's a shame that our elementary children have to travel in overcrowded buses to schools despite the fact that we pay so much money in taxes. Alcott is 3.7 miles away from where we live, Evergreen Middle is 2.8 miles and Eastlake High is 6.1 miles away. Our high school kids, need to wake up as early as 5:45am in order to take the bus at 6:30am to school. I know most of the high schoolers either car pool in the morning hours and use public transport to return back home, to save their time in the evening, and get a 30 minute extra sleep time in the morning. Sadly we don't see anything happening when the planning takes place to address this issue. Most of the residents are employees of Microsoft / Amazon.
79	Planning	Just keep classrooms big! thanks
80	Planning	Please update your models to better reflect real population growth. Review where the capacity models were wrong in the past (LWHS, RHMS, Ben Rush, all recently re-built. All overcrowded.)
81	Positive Comments	I trust that our facilities are monitored closely by the district and that you are better equipped to answer this question than I.
82	Quest	Quest locations for the elementary and middle school for Lake Washington/Kirkland area: Move quest program from Thoreau elementary which is really far from Rose Hill and Twain to Rose Hill/ Twain/Franklin or somewhere near downtown Kirkland The Thoreau location is too far( almost 1 hr one way by bus, even more when there is snow) for most families attending the quest program and there is no location in Central Kirkland for Quest. This compared to Redmond area quest locations is really unjust for the students who live in Central Kirkland and have to go to all the way to Thoreau elementary Same for Middle school: move quest program to Rose Hill or Kirkland middle school
83	Quest	Move self-contained quest to another building in LWSD that has empty classrooms, unless we have enough enrolled to house quest students from our own neighborhood. The program currently uses 4 classrooms in a building that has already had a wing added on. We are overflowing into portables as it is, and with 30 classrooms, we have a nightmare scenario for lunch and specialist scheduling. Spread self contained quest out to the neighborhood schools. It's better for the students and the capacity problem. Don't punish one school because it is not on a wetland.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

84	Quest	Move Quest students from Thoreau Elementary
85	Resource Center	Added space for the RC and support services staff or better yet, make it a standard that staff can work from home. Refit the office model as shared spaces when staff do go to the RC or support services . Many jobs can be done remotely and not cost the district extra money.
86	Resource Center	I would like to see the Resource Center enlarged or moved to a bigger facility.
87	Schools - Alcott	Rebuild and expand Alcott ES
88	Schools - Alcott	a comment for Alcott. The school might not be up to date but I think the biggest issue is the large amount of portable classrooms. Besides from not looking very nice it also gives a divided feeling between the main building and the portable classrooms.
89	Schools - Alcott	A new high school in Union Hill area. Or reboundry Union hill area to Ella baker/timberline/Redmond high. Alcott is our school and it is way over capacity.
90	Schools - Alcott	Additional restrooms/stand alone restrooms for the students in the portables. Drinking fountain outside for portable students and recess. At this point, Alcott only has 1 drinking fountain for the whole school.
91	Schools - Alcott	ALCOTT
92	Schools - Alcott	Alcott
93	Schools - Alcott	Alcott - it's been a long time since the premises has been upgraded and the number of students have increased so this is a must needed upgrade.
94	Schools - Alcott	Alcott Elementary
95	Schools - Alcott	Alcott Elementary
96	Schools - Alcott	Alcott Elementary
97	Schools - Alcott	Alcott Elementary facility does not meet OSHA requirements and needs to be a high priority. Not only are they over capacity with 12! portables, they also have few bathrooms for kids and ONE for staff/visitors. They do not have a cafeteria which, along with having few bathrooms, creates more challenges for the custodial crew.
98	Schools - Alcott	Alcott elementary has an extremely large land area that could be developed into many great things. The modular buildings must go. Fields and activities need minimal investment in the short term to better reflect LWSD's commitment to children's healthy growth and play.
99	Schools - Alcott	Alcott Elementary is already on the list. It has been put on the back-burner once already and I am hoping that it is given higher priority this time around. Right now it has both capacity and aging issues. Even if it were at capacity and not over it really needs to be re-built.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

100	Schools - Alcott	Alcott Elementary is in need of most urgent upgrade
101	Schools - Alcott	Alcott Elementary is very old, has a lot of portables, and no cafeteria the kids are eating in classrooms.
102	Schools - Alcott	Alcott elementary needs to be rebuilt
103	Schools - Alcott	Alcott Elementary School because it is very difficult for younger students to be in portables. There are 2 bathroom stalls for over 60 staff members.
104	Schools - Alcott	Alcott Elementary School
105	Schools - Alcott	Alcott has needed attention for a long time, it reminds me of the poorly Juanita high school building (now updated). Our population spikes so high at times that the teachers are using every available space and spaces are very dingy and feel slightly damp in pods/over or under heated in portables . I have had children in that school for 11 years and we have 3 more years to go. I would like to see that this building gets the needed attention. I feel that the Evergreen building is in a similar state. We need to fix current school buildings first.
106	Schools - Alcott	Alcott needs more facilities such as bathrooms and HVAC to better serve both students and Staff, and make for a better learning environment.
107	Schools - Alcott	Alcott needs rebuilt desperately.
108	Schools - Alcott	Completely rebuild Alcott Elementary to accommodate for continuing growth. At this point Alcott has close to 700 students with only 4 boys bathrooms and 4 girls bathrooms. All of the students in the portables are having to come into the building to use the restrooms by the gym which are also the restrooms used for recess. They also only have 1 drinking fountain for the whole building. Every classroom and portable is in use and some specialists and the school nurse are having to share rooms. There is only 1 gym that is in use the entire school day so students are required to eat lunch in their classrooms. There really is no room to expand.
109	Schools - Alcott	Expanded and new facilities at Alcott. Aging structure and growth needs.
110	Schools - Alcott	Just rebuild a new school: Alcott Elementary. Definitely need more bathrooms for students and especially for staff!! The old building school doesn't meet the educational specifications. Building is constantly cold no matter what temperature you put it on...building is just not energy efficient.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

111	Schools - Alcott	Louisa May Alcott Elementary school- We are in an old building and have outgrown the space. We were built for around 400 (and some students) but now have over 700 students enrolled. We are constantly running into the problem of not having enough spaces for classrooms. We even have floater teachers to help in grades because we have too many kids for the original number of teachers but not enough classrooms to help our students be in a smaller class sized environment. We only have 3 kid bathrooms for all of these students. There are often times the kids in the portables (3rd and 5th grade) are having accidents because they can't walk across the campus quick enough to their closest bathroom (plus they have to navigate through a locked door). Sometimes when they get there the bathroom is full. We have a staff of mainly women and we have two toilets for "ladies" we had to convert the men's adult bathroom to a Unisex because the line was too long for the ladies bathroom and we only have so many minutes between classes. Getting into the bathroom is like a puzzle because it is so small. We have too many staff members to sit in our staff room for lunch break. The students eat in their classrooms because we have no cafeteria. There are often food spills in the classroom or messes left behind from kids' lunches. With our capacity being so high it is always super hard/impossible to schedule an appropriate amount of recess time for the students to get outside to get fresh air and exercise. In order for all of the classes to have PE 2x a week we have to double up some of the classes. This puts having 50ish students in the gym running around and sharing equipment and space so they get their PE minutes in.
112	Schools - Alcott	Please update Alcott, it is crazy old and falling apart. Dead birds fell through the ceiling
113	Schools - Alcott	Rebuild and expand Alcott Elementary.
114	Schools - Alcott	Remodel Alcott Elementary!
115	Schools - Alcott	Remove portables at Alcott and add cafeteria.
116	Schools - Alcott	Renovate and modernize Alcott elementary.
117	Schools - Alcott	Space is so tough at Alcott and the building is old. I worry about the water and there are many creatures.
118	Schools - Alcott/ EMS	Both Alcott and EMS are aging and never get priority for upgrades/ rebuild. Please address needs of both these schools. My kids may not be part of the newer facilities but hopefully others will benefit.
119	Schools - Alcott/ EMS	Evergreen Middle AND Alcott should both be on the very soon list of re-building.
120	Schools - Alcott/ Rockwell	Highly support remodel of both Rockwell and Alcott Elementary. Both schools more than meet the "aging and capacity" criteria.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

121	Schools - Alcott/ Smith	For Eastlake I would recommend Smith and Alcott as planned.
122	Schools - Alcott/ Smith	We need to rebuild Smith and Alcott elementary schools before we keep adding to other schools. Some schools are tabbed for additions when they aren't even needed yet while Smith and Alcott keep getting pushed to the back burner. They were supposed to be rebuilt by now. but instead schools like LWHS are getting additions soon after being redone. Smith is one of the highest ranked elementary schools in the district, yet it's the oldest and completely falling apart. Thank goodness for great teachers who keep putting kids first while having to deal with lack of heat, walking outside to go to other parts of the school and horrible portables. These are 30 year old portables that need to go, yet again Smith and Alcott are being overlooked. Why?? Why do these two schools keep getting pushed off?? I was teaching in a portable when my heater broke in the middle of winter. A worker from the district came out to look at it. He told me that since the heater in my room is no longer being used IN ANY building or made for that matter, he was going to have to try to find a part in another old heater that wasn't in use anymore at one of the old school sites. Thankfully he found the needed part, but my students and I had to suffer through no heat for a few days all because our school has SO many students and not enough classrooms IN the building. Again, why is Smith and Alcott being pushed off??
123	Schools - Alcott/EMS	Alcott and Evergreen both needs expansion and upgrade. In Alcott, there are 11 portables, and there are no bathrooms in those portables. Evergreen Middle school is aging and need spaces for kid's clubs activities, and new playground or gym for sports. Both schools have large enrollment and the building can't meet the needs.
124	Schools - Alcott/Smith/ Rockwell	Alcott Elementary Smith Elementary Rockwell Elementary
125	Schools - Audubon	Audubon Elementary is full. We have portables and shared spaces being used as classrooms. A new apartment building will be built within the next two years that houses hundreds of families inside our boundary lines. How are you going to accommodate all these families when we are already full?
126	Schools - Audubon	Where is Audubon on this list? The portables are in POOR condition and the building has had pipes burst, ceilings leak and is constantly cold. Layout has only one floor with students learning in shared spaces, store rooms, art rooms, tech rooms, etc.
127	Schools - Blackwell	Blackwell Elementary. Last year, Blackwell did not have a classroom available to add a kindergarten class.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

128	Schools - Blackwell	Blackwell Elementary. To expand capacity and address aging facility.
129	Schools - Dickinson	Dickinson Elementary has many old portables which are considered not usable. Why doesn't the district tear them down? Previously some of these portables were used for the Preschool but I believe the preschool has been moved to the Old Redmond Schoolhouse... so what is the plan for those "unusable" portables? That is land that could be used for something else to accommodate students?
130	Schools - Dickinson	Dickinson Elementary. It is an old building and does not house room for students. Also there are older building on the property that are unsafe for people to be in. There is black mold and rodents living in these buildings. Why is this even happening! These children are our future and this is how they are treated?!
131	Schools - Dickinson	Dickinson elementary. Aging facility with outdated classrooms and layout.
132	Schools - Dickinson	Emily Dickinson is falling down. Bad ventilation and smells like mold . Get rid of portables
133	Schools - Dickinson	Is there a plan to utilize the space available at the Dickinson Campus?
134	Schools - Dickinson	Tear down the old moldy preschool buildings at Dickinson Ele! Put something else there. Choice school?
135	Schools - Dickinson/ EMS	You must remodel Dickinson Elementary and Evergreen middle school. They are awfully rundown, out of date and unacceptable. It is completely unfair that some kids are going to brand new facilities but that you have focused no money or attention on bringing the old facilities up to reasonable levels of comfort and function.
136	Schools - EAS	Add on to FHMS rather than move EAS to a different building
137	Schools - EAS	I think you should expand the amazing Stella Schola program in permanent classrooms. EAS has done well at a larger size, and Stella could easily double to add extra middle school seats. A lot of my friends want to be in a choice school like Stella but can't get in, so this would really increase their chances. High schools like Redmond also seem to be quite impacted by overcrowding, so immediate additions there are most important too.
138	Schools - EAS	Please do not move EAS. Losing the greenhouse would be a big loss.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

139	Schools - EHS	Eastlake does not have enough science classrooms to address our growing population. It is a rarity if a science classroom is not in use with students during the day. This results in science teachers moving rooms throughout the day, meaning moving supplies and making it difficult for students to and staff to find teachers. Eastlake needs support increasing our science classroom capacity.
140	Schools - EHS	Eastlake High School is BUSTING at the seams. Where are you getting those capacity numbers?! Definitely doesn't seem correct. Curious as to why there has been very little done to improve the EHS facilities, when enrollment there is probably the highest in the District. EVERY other LWSD High School has had MAJOR improvements. When will it be Eastlake's turn?
141	Schools - Elementary	I find the inequity across aging facilities and new buildings significant, and the old buildings are all elementary, is that correct? Do any middle school or high school students or staff have to work in buildings with 1 adult bathroom split into 2 stalls, portables and furniture from decades ago, unclear office access for visitors, etc? I appreciate all the work to make things better for all LWSD.
142	Schools - EMS	Evergreen Middle School looks like a dump. Especially when compared to Timberline, which is less than 5 miles away. The track and soccer fields are a joke, there's no spectator stands, the tennis courts have depressions, the building looks like it was built in 1967 and the whole area looks shady and unused. It's bad enough that half the school is in portables but why should my child attend a school that looks like a drug front while classmates literally up the street attend a beautiful, state of the art school? I'm not voting for any bonds while my children are treated like waifs from a ghetto.
143	Schools - EMS	I am not sure that I understand what you mean by rebuild Evergreen Middle School. There are only three relatively new portables. The other portables need to be replaced all at the same time to provide more natural light, modern furniture and comfortable chairs for students. There is an entire baseball field available to add more portables or an 8th grade campus to house many more students.
144	Schools - EMS	I feel that Evergreen Middle School really needs to be torn down as soon as possible and rebuilt. There seems to be enough land that the new school could be built while the other school remains open. I also feel that a new Redmond "North" High School would serve the area much better than a new choice school. The Redmond North area is growing and really needs its own High School.
145	Schools - EMS	I hope Evergreen is slated for remodel soon. It's in pretty bad shape but has tons of space to rebuild.
146	Schools - EMS	I want the improvements done at Evergreen Middle school.
147	Schools - EMS	Leave Evergreen's "footprint", gut the interior leaving the structure, rebuild the internals and expand into the unused spaces (two courtyards).
148	Schools - High School	A comprehensive high school rather than choice high schools (which contribute to long commutes and situations of inequity)

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

149	Schools - High School	ad smaller high schools
150	Schools - High School	add a High School in the Redmond Ridge area.
151	Schools - High School	Build a 5th comprehensive high school!!
152	Schools - High School	Build a new high school to alleviate the capacity issues at Eastlake that is not a choice HS. The drive and commute for students not in the Plateau to get to school is long and unpredictable. A new HS should be considered near Evergreen to serve this area.
153	Schools - High School	I would like to see a project that adds another high school in LWSD that is not a choice school. Choice schools are not always an option for families with multiple children, if you'd like to keep them in the same school and can't guarantee spots for a sibling. The district needs to find a solution that addresses everyone and doesn't penalize kids that want to stay at the main high school.
154	Schools - High School	You need a regular not choice high school in Redmond ridge area so timberline and evergreen feed into that school instead of going such a distance to the current HS. Also should consider district change for the people on the ridge who are required to go down to riverview. Poor planning has sent my elementary school age kid to 3 different elementary schools from reboundary.
155	Schools - High School	Build an additional HS in Redmond area is more important than add choice school(s) in this area. Reboundary in HSs
156	Schools - High School	There is a huge need for another high school.... RHS is ridiculously over crowded .... you put in new Elementary and new middle schools but where are all going to be funneled into the over crowded some aging high schools ??!!
157	Schools - IMS	Remodel/rebuild INglewood
158	Schools - IMS	Add capacity to Inglewood Middle School. Expand the school on the existing property.
159	Schools - IMS	Ingelwood Middle.School is old, and needs refurbishment. Also, please re-draw boundary so that more Redmond kids go to Evergreen.
160	Schools - IMS	Inglewood Middle School - Capacity Issues and Aging Facility.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

161	Schools - IMS	Inglewood Middle School has got to be addressed. There is not enough room for all the students, teachers don't have their own classrooms, no stage and yet they win a ton of band awards, my daughter stands to eat lunch, bathrooms are depressing and adds to students insecurities when they see themselves in the light used in the restrooms. Curriculum night is a nightmare. For that matter drop off and pick up is worse. It impacts regular traffic flow of the city. Even if someone lives less than a mile away from the school, they have to leave at least 40 minutes before school starts to "hopefully" get their kid to school on time. Its ridiculous. The school does not reflect the "affluent" area we read about in the write ups about Sammamish. LWSD should be embarrassed for the neglect. Is the LWSD keeping tabs on the amount of homes being built in the area? Wake up...more are coming!
162	Schools - IMS	Inglewood Middle School.
163	Schools - IMS	Inglewood MS expand/rebuild
164	Schools - IMS	Is Inglewood Middle School at capacity? It seems like such a HUGE enrollment for a 3 grade school.
165	Schools - IMS	Issaquah has been completely rebuilding schools adjacent to existing properties. I would like to see a similar patter for LWSD. Inglewood Middle School and many elementary schools are perfect candidates for this plan. Please bring back lockers. My kids have two homes and the lack of lockers at Inglewood creates particularly heavy backpacks.
166	Schools - IMS/ EHS	Inglewood - this is an old building that is beyond capacity. Making new boundaries will help but the rate houses are being added it will be a short term solution. Inglewood and Eastlake need more space and Inglewood needs new facilities - the locker rooms are beyond capacity every period, the halls are so small moving 1300 people in 5 minutes is nearly impossible, there isn't space for all kids at lunch (some sit on the floor or don't eat and just go to the library), IMS needs to be addressed both with new boundaries as well as new building.
167	Schools - Intermediate	Consider building "Intermediate Schools" for grades 5/6 to alleviate crowding at Elementary and Middle Schools. This solution addresses both facilities needs and children's developmental needs.
168	Schools - KAMS	- Rebuild or expand Kamiakin. It is the oldest school in the district.
169	Schools - KAMS	Expand Kamiakin and don't move EAS from it's current location where it has been since its founding.
170	Schools - KAMS	I want to emphasize the importance of expanding/rebuilding Kamiakin Middle School as well as the refurbishment of the JHS fieldhouse and pool.
171	Schools - KAMS	Kamiakin has been last on the priority to get up graded, and we are now more than ready and deserving to get some help and attention

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

172	Schools - KAMS	Kamiakin is an aging facility that does not currently meet the needs of the community it serves. Before another program can be added (like Stella Schola), the facilities need to meet the needs of the increasing population there.
173	Schools - KAMS	Kamiakin is in desperate need of a new building. It is the oldest building of all those listed besides the JHS fieldhouse. I have spent many hours volunteering in that school and because of the old HVAC, it's difficult to hear what the teacher is saying. How much do the students miss because they can't hear. Building a new school that is larger and has in its plans space for Stella Schola (1st) or EAS (2nd) would make sense.
174	Schools - KAMS	Kamiakin is in desperate need of a remodel and expansion. This community has been left out and forgotten for too long in the district. Please make this a priority!
175	Schools - KAMS	Kamiakin is the most diverse school in our district. Kamiakin Middle School has run down athletic fields and is one of the oldest schools in the districts. The gym floor is old, gym dark. Juanita just got redone. Let's take care of Kamiakin.
176	Schools - KAMS	Kamiakin needs a rebuild not just an expansion. There are classrooms with no windows, it is not compatible with new technology, the gym floor is beautiful, but the ceiling is constantly crumbling on it, such that kids are always slipping and falling. My kids came home from basketball practice with huge bruises on their knees all the time & other school they play always said they were clearly trash since the school was! There is no way to show videos or movies to a large audience (ie bigger than a classroom). The lockers take up space but are so rusted & full of critters that they are unusable without a huge cleanup cost.
177	Schools - KAMS	Kamiakin needs the boost. Help them out!
178	Schools - KAMS	Kamiakin needs to be rebuilt. Period.
179	Schools - KAMS	Kamiakin. As a parent it's infuriating that some schools are on their second rebuild or addition and yet the district can't even supply KaMS with new portables or blacktop instead of gravel, which prevents the backdoors from closing--causing a safety issue.
180	Schools - KAMS	Upgrade Kamiakin and change the boundaries to better balance the Learning Communities.
181	Schools - KAMS	Rebuild Kamiakin Middle ASAP. Its the oldest and worst condition in the "fleet" and far behind the quality of any other school in the district. This should be priority 1.
182	Schools - KAMS	Rebuild Kamiakin
183	Schools - KAMS	Rebuild Kamiakin MS
184	Schools - KAMS	Please prioritize rebuilding and updating Kamiakin Middle School and redrawing the boundary for Finn Hill Middle School over moving the EAS campus to Kamiakin's campus.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

185	Schools - KAMS	Kamiakin has significant needs. Thank you for addressing those needs in this round.
186	Schools - KAMS	Kamiakin is in desperate need of a revision. Please, please make this a priority.
187	Schools - KAMS	Kamiakin should be prioritized not just because of capacity shortfall. It is a severely outdated/unsafe structure. Plumbing issues cause bathrooms to close frequently and there aren't enough to begin with. My kid was never able to use the restroom during the day while attending which is just ridiculous
188	Schools - KAMS/ JHS Fieldhouse	Kamiakin Middle School Rebuild and Enlarge and Juanita high school fieldhouse projects are long overdue. They don't even compare with other facilities in the district. Please put them both at the top of the list!
189	Schools - KAMS/JHS Fieldhouse	Kamiakin Middle School Rebuild and Enlarge and Juanita highschool fieldhouse are both long overdue projects. They don't even come close when comparing with other facilities in the district. Please put them at the top of the list!
190	Schools - KiMS	Making Kirkland middle way bigger! We live within walking distance yet have to drive 9miles to Finn Hill! All our sports friends go there, so kids are separated! Better parking lot efficiency, flow, more room fir building!
191	Schools - Lakeview	Increase capacity at Lakeview Elementary
192	Schools - Lakeview	Lakeview Elementary is an aging school building with lots of portables. It's unclear in the committee's recommendations above if the proposal would also benefit/retrofit Lakeview or whether it's securing/building an entirely new elementary school within the LW area.
193	Schools - Lakeview	Lakeview Elementary is over capacity and zoning changes to allow more construction is being pushed in the surrounding area . These inevitable changes will increase the number of families living nearby with school-aged children and push Lakeview Elementary's enrolment numbers up. There is very little land at this school for adding portables. Is this school overcrowding addressed by "New Elementary School (LW Area)"? It is not clear to me what area 'LW Area' encompasses. Also, please consider hybrid in-person and online learning.
194	Schools - Lakeview	Lakeview elementary looks like a prison yard outside. Young children need inspiring landscape like peter kirk elementary has for play based learning and connection with our natural environment. Lakeview Elementary might as well be in the middle of Manhattan. We're literally trying to move just to switch elementary schools.
195	Schools - LWLC	Lake Washington High School and a new elementary school in the LW area.
196	Schools - LWLC	The Lake WA LC is bursting at the seams right now. Is it possible to obtain/lease building around Microsoft to use as an elementary schools?

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

197	Schools - McAuliffe	Expansion of McAuliffe elementary New middle school in Sammamish area
198	Schools - Middle School	Increase capacity at LW and Redmond area middle schools and move 9th grade to have it more of a junior high to limit capacity and the need for additional HS buildings in these communities.
199	Schools - Other	Prioritize schools with lowest SES and racial diversity to align with district goals around equity and closing opportunity / achievement gaps for traditionally marginalized students.
200	Schools - Redmond EI	Redmond ES recently added a new wing to the school increasing student capacity. However the cafeteria and kitchen facilities were not updated to match the growing student population. Please also consider better covered areas for students.
201	Schools - RHS	A new Culinary Arts classroom should be added to RHS in the expansion so that RHS is up to the standards of the LWHS and JHS sites. This is an extremely popular CTE class and having a new facility will allow the students to work in a more professional kitchen environment plus address ventilation needs.
202	Schools - RHS	Expand RHS
203	Schools - RHS	Redmond High School
204	Schools - RHS	Redmond High School has more than 2000 students. It's one of the biggest amount of students in the Eastside of Seattle. I think there should be a "traffic system" to organize students so they don't have to walk a lot in between classes because the halls are too crowded, it's almost impossible to walk. There should be a computer program for that, similar to the ones used in airports. There should be a way to distribute where the teacher's classes are so the student don't have to walk too far. It would avoid (viruses too).
205	Schools - RHS	Redmond HS absolutely needs additional music classrooms. We currently have 3 separate programs sharing one classroom, which is ridiculous.
206	Schools - RHS	Update and expand the Performing Arts classrooms at Redmond High School. Redmond HS has a thriving and growing Performing Arts program that are sandwiched into, and vying for, space in 2 small, outdated teaching classrooms. The music program itself serves between 300-400 students. The piano lab also needs to be expanded since the current space can only hold 20 students instead of the normal classroom size.
207	Schools - RHS	But would like to see traffic being consider in all aspects of any project. Especially traffic on 104th to and from RHS when in-person classes start back up.
208	Schools - RLC	New school I. Redmond area

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

209	Schools - Rockwell	As a teacher at Rockwell, it would be amazing if we could keep the current classroom sizes if and when it is rebuilt so future capacity can be met. It is also great having a closet in my classroom and I could see this as a value to all grade levels, not just Kindergarten. Bathrooms in classrooms seem like a really germ heavy idea in the age following COVID. Thank you for considering us! It means a lot! Our aging building is very sad but we love working there.
210	Schools - Rockwell	Fully update Rockwell elementary
211	Schools - Rockwell	I definitely think Rockwell needs a complete remodel. I was asking the principal about getting a washer/dryer. He said the electricity couldn't handle a griddle, as he just tried to make pancakes for the teachers for a morale event (Spring '19) and blew a fuse- just by plugging in a pancake griddle. That school needs a lot of work!!
212	Schools - Rockwell	I'm glad to see Rockwell back on the list of aging schools that will be replaced. I hope this project becomes a reality.
213	Schools - Rockwell	My personal concern is Rockwell Elementary, which is already on the list. I couldn't believe that after all that elementary school redistricting, they hadn't gotten rid of portables! Especially when some elementary schools are below capacity. When they were doing all the surveys and asking us about redistricting, I had NO IDEA that all those capacity numbers listed included portables. Portables should always be an asterisk, with non-portables numbers front and center. Rockwell portables should have been put in the driveway so parents have to see them every day when they drop off students.
214	Schools - Rockwell	Norman Rockwell Elementary school is old and needs to be updated and rebuilt. We have been on the schedule but keep being bumped down. It is time!!
215	Schools - Rockwell	Norman Rockwell has 5 very old portables. These need to be updated or expand the building. These portables are not equitable to students.
216	Schools - Rockwell	Our kids at Rockwell could really use a space for quiet and sensory.
217	Schools - Rockwell	Please add sensory room to Rockwell elementary when rebuilding. Many students need this space and we do not have. Please consult interventionists (i.e., SLP, OT, PT, ELL, Safety Net, High Cap) on what needs they have for their spaces. As interventionists we are often placed in the "left over" spaces in buildings, despite having high quantities of students with some of the most unique needs.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

218	Schools - Rockwell	Please rebuild and enlarge Rockwell. It is one of the oldest schools in the district and is not efficient. It was supposed to be rebuilt along with Peter Kirk but was taken off of the levy that passed. It is time.
219	Schools - Rockwell	Rebuild Elementary schools - Rockwell.
220	Schools - Rockwell	Rockwell Elementary desperately needs a "sensory room"! (Similar to one at Mann Elementary.) This space is essential for student's to self-regulate their emotions, keep themselves and others safe during movements of crisis, etc. This sensory room would benefit students of all abilities. I STRONGLY believe this a crucial addition needed. Please don't hesitate to reach out to me at aowenkachikis@lwsd.org.
221	Schools - Rockwell	Rockwell Elementary dues to aging facility issue.
222	Schools - Rockwell	Rockwell Elementary is a great school but the building is old and the student population far exceeds the building capacity. Please prioritize updating Rockwell. The students deserve it.
223	Schools - Rockwell	Rockwell elementary is an aging elementary that has been Pushed back for years from being rebuilt and remodeled. Kids have been using the 'temporary' portables for almost 10 years and that's unacceptable! It's time for a rebuilt, there is plenty of space for a new building, gym, lunchroom and comfortable classrooms for the kids!
224	Schools - Rockwell	Rockwell elementary is badly in need of upgrading.
225	Schools - Rockwell	Rockwell Elementary is in serious need of a remodel. It is the oldest school in the district that hasn't been updated.
226	Schools - Rockwell	Rockwell Elementary School desperately needs an update. It's a wonderful school with a very old building. Surrounding schools are new or updated, its time Rockwell is rebuilt!!
227	Schools - Rockwell	Rockwell elementary. Desperate need of expanded lunch/gym area- lighting is old
228	Schools - Rockwell	Rockwell ES is in dire need of rebuilding, it has one of the best reputations but is visibly falling apart. This needs to be done before it becomes an emergency.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

229	Schools - Rockwell	Rockwell is on a large plot of land. IF you are going to rebuild it, it would be great if you didn't go away from the large classrooms and keep them BIG. As a teacher I KNOW that the CLASSROOM is where the kids spend most of their day. It is crazy that so many of the new schools have wasted soooooo much space on shared learning areas. With the Covid pandemic this is going to really make in-person learning so much more dangerous and difficult. KEEP THE CLASSROOMS BIG! thank you!
230	Schools - Rockwell	Rockwell is showing it's age and the constant influx of students is making it harder to keep up. Please put a focus on Rockwell!
231	Schools - Rockwell	Rockwell needs attention! It needs to be updated -- no open corridors between classrooms, more restrooms! There is one very small restroom dedicated to women and men. The vent system is old in all restrooms. It has a terrible locking design with too many different keys for each area. It has been a beautiful school that has served its purpose but needs enlarging and updating!
232	Schools - Rockwell	Rockwell needs to be renovated.
233	Schools - Rockwell	Rockwell needs to be updated. Either with an expansion or rebuild. The portables that teachers are being sent to teach in are not large enough to house the class sizes and are old and falling apart. Keeping the large classroom sizes is still important to us.
234	Schools - Rockwell	Rockwell! It has been beyond it's capacity for sometime now and the building is too old to consider expanding.
235	Schools - Rockwell	Rockwell, aging facility, needs a facelift
236	Schools - Rockwell	Yes! I have worked at Rockwell since 1992 and although still functional and clean, it is very old and is in need of many repairs and different design. The design is inappropriate for our northwest weather. Walking outside from a class to the library or gym is terrible. We have to utilize our gym for all of our services! PE, lunch, assemblies, overflow - we do not have a "commons" area for plays or any kind of extra space. Like when we have picture day - we have to re arrange the gym to cover all of the events. Hallways are cement and cold in the winter. Our ceiling tiles are old. The lighting could be better. If our custodians were not as great as they are, we would be in really tough shape. Only one female and male bathroom! That is unacceptable! We have 60 staff and 99% women! The outside intercom does not reach the portables in the event of an emergency or fire drills. We call their rooms. Kitchen and staff lounge are very small and outdated. Thank you.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

237	Schools - Rockwell/ RMS	Expand Redmond Middle School, Build a new building where the portables are. A two/three story tall building right where the back parking lot is, move the parking in lot ( bus entrance) further down by the portable area. This can potentially create 8 rooms per floor ( 16 classrooms at a 25 students capacity, will expand capacity to Aprox 400 students! Rockwell absolutely needs a more efficient layout and use of space, parking also needs to be enlarged as it is a huge problem in the neighborhood. If we build a similar structure to Claire Barton, that would be a lot more space efficient Add a building where the portables are is a huge plus.
238	Schools - Sammamish	Eastside has been suffered from crowed classroom and portable classroom across the board from elementary like Smith, middle school like Inglewood and high school like EastLake. Many of our kids have been using portal classroom from grade 3-5 and run 30-40 minutes commute daily to go to Evergreen middle school or Redmond Middle school. Given many new schools have been built in Redmond and Kirkland, I don't see much progress on Eastside except Mead elementary expansion from last year. I really appreciate if we could prioritize properly this year with fair coverage of aging facilities in east side. Thanks!
239	Schools - Sammamish	Hand over Sammamish to Issaquah school district. You have no land on Sammamish to build anything and the majority of our schools are aging dumps. The district is too big and for whatever reason Sammamish schools are last on the list. We want to be a part of a district that takes care of their buildings AND their students.
240	Schools - Sammamish	I just want to share that I believe the growth amongst middle and high school levels in the Eastlake learning community is underestimated. Also, this area has been ignored over the past several years, as improvements have largely been made to schools in Redmond and Kirkland. Sammamish residents feel that their voices are not being heard and their tax dollars are not being used fairly across the district.
241	Schools - Sammamish	I live in Sammamish, and have heard of the overcrowding and inferior facilities at Inglewood MS which I hope will be addressed sooner rather than later. With all the construction happening in Sammamish (especially off of 244th) it seems like Inglewood can ill afford any delay in addressing the need to upgrade its facilities. Likewise, I am surprised that Eastlake HS is also not their facility is not reflected on the table as a HS that the district has identified as one that needs addressing for the same reasons I noted for Inglewood.

242	Schools - Sammamish	I would strongly recommend that you re-consider the estimates for Eastlake's learning community. The estimated "capacity shortfall" for this area, for both middle and high school levels just don't make sense given the high level of growth in the Sammamish area. Also, the vast majority of LWSD building projects in the past several years seem to have been centered outside of the Eastlake learning community. This seems very unfair to the residents of Sammamish, where our schools are overcrowded, and we are not receiving the same level of relief as schools in both Redmond and Kirkland.
243	Schools - Sammamish	Inglewood Middle School and Eastlake High should be upgraded to match the Issaquah schools
244	Schools - Sammamish	New elementary school in ELC, since even with portables, the short fall is very high. Housing growth continues to increase on the plateau and near 202.
245	Schools - Sammamish	Please consider choice schools entirely housed in portables, like Renaissance, as well. Also, several schools have traffic patterns that are disastrous, both for families as well as the overall community. Inglewood blocks up Inglewood Hill Rd in both directions every morning and afternoon. In the morning, it ends up with stand-still traffic from 228th. Smith blocks up large portions of 14th, and drive-through goes through their parking, so if anyone needs to leave, they are stuck until the line is gone. Eastlake shares one entrance/exit with the backed up road for Inglewood, making the pattern worse in the afternoon. Also, the long line of exiting cars in the afternoon means no way to get out of the shopping area and go south, since one road is blocked by IMS traffic, and the other is blocked by EHS traffic. I'm sure these are hard to solve, but please consider traffic patterns along with building capacity as these school have grown far larger than they were when the current traffic plans were put in place.
246	Schools - Sammamish	The Eastlake Feeder Community would like to be our own school district. We don't need more choice schools. We don't need more portables. We don't need to redistrict our kids to a different school. We need more schools! LWSD is too big and the Sammamish area is funding a huge portion of the education funds through our property taxes. We don't have many businesses like Redmond and Kirkland to help support the schools through taxation. We feel our area needs help, too, and our taxes are mostly funding other areas.
247	Schools - Sammamish	Use Dickinson/Evergreen site to build a comprehensive high school and new middle school. Keep mid-90s Dickinson building for elementary. Share fields, etc for 6-12.
248	Schools - Sammamish	Do you have any idea how much growth is happening on the Sammamish Plateau? We have thousands of new homes and apartments that have been built or are in the process of being built, bringing in scores of new students. What is your plan to accommodate the population explosion up here?

Projects to Add to List**

249	Schools - Smith	My children attend Samantha Smith Elementary. Is this school scheduled to be remodeled at some point?
250	Schools - Stella Schola	Expand capacity of Stella Schola and move it to a campus (rather than portables). It has been operating since 2000 and proved to be a great school that built positive relationships with the community and continues to provide exceptional education for the middle schoolers.
251	Schools - Stella Schola	Expand Stella Schola MS to two sixth grades, two seventh grades, two eighth grades (from 90 students to 180) when relocating to Kamaikin MS.
252	Schools - Stella Schola	In regards to moving Stella Schola to Kamiakin, this would be a great opportunity to allow this amazing choice school to expand. They have a very long wait list with many families wanting to get in. By creating a facility that would accommodate two 6th, two 7th, and two 8th grade classes at Stella would be a huge win for the choice school community.
253	Schools - Stella Schola	Keep Stella Schola in permanent classroom space. Consider doubling enrollment at Stella, as this is an established, successful program that can be grown to meet huge demand and needed middle-school seats. (My daughter had a truly amazing experience at EAS, which is almost twice the size of Stella ... just right for students to feel known yet interact with more kids.) ****Avoid sticking Stella back in portables, which devalues the strong school community who fought so hard for permanent space and weakens the program, community and group opportunities, and interest from families.**** It's a top priority to maintain and expand programs that are working well, rather than put them at unnecessary risk when they can actually be part of the solution for growth. My youngest child just joined Stella this year, but we would reconsider if the program moved to portables ... we were already in portables multiple years in a row in elementary school and want to avoid repeating that. Redmond High is also in desperate need of more space. Too bad it has come to this without more long-range planning.
254	Schools - Stella Schola	Relocate Stella Schola MS to expand the class capacity. The school curriculum is excellent, faculty and level of parents involvement/volunteer are exceptional. Every year there they have a long waiting list. They need to have more capacity to give such an excellent educational opportunity to more children.
255	Schools - Stella Schola	Stella Schola could grow and take in more kids! It is a great school, and more kids who want to could go. I think it's very sad and disappointing if we have to leave our building that Mrs. Tennis and everyone worked so incredibly hard for all those years. It seems like all kids could go to a class or two in portables, and not just choice school kids being in them all the time. :( That doesn't seem right, and I hope you agree and keep us at Stella part of a school community in a real classroom space!

256	Schools - Stella Schola	Stella Schola should NOT go back to a portable! • Stella spent its first 13 years in portables before finally moving into the building we have now (potentially being moved to portables now seems inequitable and insensitive to the families we serve). • Over the past 20+ years, our students and staff have worked to build positive relationships with the community that are vital to creating and maintaining the home-school connection. • If strongly advocated for by the community, relocation could provide Stella the opportunity to expand our capacity in a new and comparable building to accommodate two sixth/two seventh/two eighth grades.
257	Schools - Stella Schola	The district should consider doubling the size of Stella for more middle-school seats in permanent classroom space. That would make Stella comparable to EAS.
258	Schools - Stella Schola	the need to expand capacity for Stella Schola School
259	Schools - Wilder	Wilder Elementary is in really bad shape.
260	Schools - Wilder	Wilder Elementary needs to be updated as it is an aging facility compared to the other elementary schools nearby.
261	Schools - Wilder	It seems like Wilder and that area could take on more--how could balancing occur to help support that side?
262	Special Needs	Make sure all schools have a quiet or sensory room to help kids that may need a break from overstimulation and such.
263	Special Needs	Please consider building larger therapy (SLP, PT, OT) spaces for students. Please consider making these rooms bigger than they are in some of the other new schools built. It is important to have a space where kids can MOVE and can be in groups. Please consider adding a sensory room to Rockwell El when it is rebuilt. Please consider adding more rooms for intervention staff such as ELL and Safety Net. These teachers are constantly moved from one small space to another and in some buildings in this district do not even get a full size classroom.
264	Sports/Fields	I would add funding to update the four high school stadiums. Athletics is an important element to the high school experience. Facilities such as the bleachers, press box, scoreboards, sound systems, and lighting are well beyond their useful life. It is likely that the stadium lighting can be improved with funding through PSE (replace lighting with LED lights) that will also save the District money on the power bill.
265	Sports/Fields	Middle School turf and a better track around the fields.
266	Sports/Fields	Playground updates to older schools, specifically elementary.

**Lake Washington School District  
Facility Advisory Committee  
Projects to Add to List**

267	Sports/Fields	creating more outdoor space to allow for outdoor instruction!
268	Sports/Fields	A second soccer field at each highschool. Girls soccer teams are always getting kicked off the field especially with 100 person football teams, there is no way for them to fit on half of a field.
269	Sustainable Building	First of all, I would prioritize efficiency in building upgrades to help meet King County's K4C GHG emission reduction goals - our children are depending on us and the 2030 timing is crucial! ( <a href="https://www.kingcounty.gov/services/environment/climate/actions-strategies/partnerships-collaborations/k4c.aspx">https://www.kingcounty.gov/services/environment/climate/actions-strategies/partnerships-collaborations/k4c.aspx</a> ) Secondly, ventilation systems should be address in all schools with poor air ventilation. This would help with air quality issues for both increasing wildfire smoke exposure and infectious disease outbreaks.
270	Sustainable Building	I would add to the list the importance of ensuring building efficiency clean drinking water access adequate air filtration systems green cleaning
271	Sustainable Building	Upgrading energy efficiency for on-going cost savings on costs. Expanding solar and high-efficiency grant upgrade projects to both address aging and costs along with air pollution mitigation and resiliency. Exploring available grant funding to prioritize these upgrades, prioritizing solar-ready roofs on new buildings. Prioritizing high energy efficiency, green powered, and resilient pods for flexibility, when necessary to implement or purchase.
272	Sustainable Building	I am glad to see aging, inefficient school buildings on the priority list for upgrades. I hope reducing GHG emissions will be the focus of these upgrades in coordination with the King County K4C goals. Lowering the carbon footprint of school buildings would cut a lot of our city/county wide emissions, and the people who are relying on us to make these crucial reductions are the very students these buildings are designed to serve. According to the best available science, the time to act is now. We need to get to 50% GHGE reduction in the next decade for the best chance to avoid the worst effects. Do the proposed building upgrade plans accomplish that? For our kids' sakes, please make sure that that they do! For more information on K4C, please visit: <a href="https://www.kingcounty.gov/services/environment/climate/actions-strategies/partnerships-collaborations/k4c.aspx">https://www.kingcounty.gov/services/environment/climate/actions-strategies/partnerships-collaborations/k4c.aspx</a>
