Subject: Additional COVID-19 Positive Cases

December 15, 2020

Dear Onteora Families,

I need to share an update related to positive and presumptive positive COVID-19 cases within our District. We have been notified of two additional individuals having tested positive, and one individual being identified as a presumptive positive case.

We have been notified of two positive cases within our Woodstock Elementary community, that require no additional individuals to quarantine. We have also been notified of an individual from within our Administration that has been identified as a presumed positive, and this presumptive positive requires three additional individuals to be quarantined.

We continue to work with the Ulster County Department of Health (UCDOH), and as new information arises, we will keep everyone informed.

Again, please consider joining the forum being hosted by our Board of Education Communications Committee on Tuesday evening to discuss issues related to COVID-19. You can join with this link: <https://onteora-k12-ny-us.zoom.us/j/93429785572>

Please also continue to follow all of the recommended safety precautions including mask wearing and social distancing.

Sincerely,

Victoria McLaren
Superintendent of Schools
