# Connect to a printer on the FSSD Network

1. Ensure that your computer is connected to the FSSD network. (See "How to connect to WiFi").
2. Choose the apple in the top left hand corner of your computer.

3. Choose "System Preferences" and then "Printers and Scanners."

4. From the main printer menu, choose + to add a new printer.

5. Choose "IP."

6. On the printer, you will find a FSSD item sticker. Locate the IP on the sticker and type this into the "Address."

7. Once your printer is located, you can adjust the name and then choose to "Add" the printer.
