

## FEEDING OUR FAMILIES INITIATIVE

Very early on, our organization acknowledged the need for an initiative that would combat food insecurity during these challenging times. Due to the COVID-19 pandemic, many of our families have faced either job loss or a reduction of working hours and are therefore receiving a decreased income.

To help tackle this critical issue, we worked with local businesses and the community to receive small scale support. However, with fast growing need, greater support has become crucial. As part of our efforts to meet growing demand, ECS has identified five local grocers who offered us the option to establish a billable account so that families could shop for essential items while billing the costs to our organization.

This initiative has proven beneficial to families as well as local businesses who are in need of additional income, and we work hand-in-hand with both parties to facilitate shopping trips and ensure that all processes run smoothly.

We are looking to raise \$100,000 so that we may continue to care for those scholars and families in need. Each and every contribution helps us reach this goal.
