

Additional Safety Measures for Summer Camps 2021*

*Additional Safety Measures will be updated as recommendations change

Our summer camp procedures have been modified to put the health and safety of our campers and staff first as we seek to provide a fun summer camp experience amid the current health situation.

With guidance from the American Camping Association, Association of Camp Nursing, the US Center for Disease Control (CDC) and the state of North Carolina, we are following Covid19 summer camp safety precautions that includes practices such as smaller groups, physical distancing when reasonable, limited contact with shared equipment, frequent handwashing and enhanced sanitation practices.

Here is what you can expect at camp:

- Campers and staff will be asked to complete a health screening online prior to their camp start date
- We will utilize a carpool line for drop off and pick up. Parents are asked to remain in their vehicle and refrain from entering facilities. If you need to reach someone, please call Cindy at 704-651-4074 or Heather at 786-942-9955.
- Campers will have their temperature taken at drop off. Campers with a temperature of 100 and above will not be permitted to participate in camp.
- Camp staff and campers will wear face masks as recommended at the time of camps. Campers were not required to wear masks for camp in 2020.
- Campers will participate in small groups and have minimal contact with other groups
- When feasible, campers will be encouraged to maintain recommended physical distancing
- Campers will wash hands multiple times throughout the day as needed
- High use and shared surfaces (handrails, door handles, desks/tables, shared equipment, etc.) will be sanitized throughout the day and in between uses. Camp locations will be sanitized at the end of each day.
- Hand sanitizer and disinfecting wipes will be available at each camp location
- Campers will be provided personal space to store water bottles and snacks during camp

If you have a specific question about camp, please contact us at camps@covenantday.org

While we strive to provide a safe camping environment and are following guidance from camp associations, the CDC and the state of NC, please use judgment in determining if your camper should participate in camp if they are in a high-risk category** or lives with someone in a high-risk category**.

**A high-risk category is classified as:

- People 65 years and older
- People who live in a nursing home or long-term care facility
- People of all ages with underlying medical conditions, particularly if not well controlled, including:
 - People with chronic lung disease or moderate to severe asthma
 - People who have serious heart conditions
 - People who are immunocompromised
 - Many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications
 - People with severe obesity (body mass index [BMI] of 40 or higher)
 - People with diabetes
 - People with chronic kidney disease undergoing dialysis
 - People with liver disease
