

Below are directions on how to see all the activities your student has been assigned, which ones they are currently working on, and those they have already completed.

Step 1: Open the Seesaw App on your student's computer and click on your student's name in the top left corner of the screen. Here you will see all the classes your student is in (main classroom, P.E., Music, and Library). The red numbers show how many activities your student still needs to do in that class.

Step 2: Click on the class you want to look at.

Step 3: Click on the "Activities" tab to see the assignments your student still needs to do ("To Do"), assignments your student has started to work on but not yet completed ("In Progress"), and assignments your student has completed ("Done").
