

Robot Programming BBC game. Open the game and watch the short clip. It does not give any instructions so I have produced a simple guide to help you get started.

[How do you program a robot? - BBC Bitesize](#)

Select Robot Routes games and press start.

After you have watched the intro video and pressed 'next' select 'Medium' '1 player' and normal.

You will be asked to place the commands in the right order. The different commands will appear on the screen. You must look at the map and work out what order the instructions need to be to get the robot from his start point to the flag.

2. They need to be dragged in the right order here

1. Commands will appear here

Commands moved and correctly placed.

Then click Green Arrow to see if you were right!
