

|                                     |     | School Building and District Spread Indicators (1)  |  |   |
|-------------------------------------|-----|---|--|---|
|                                     |     | No cases in school buildings  | Building(s) with known cases (3) in staff or students but no ongoing transmission  | Building(s) with evidence of ongoing transmission (3)   |
| County Level Risk Determination (2) | Low | In person with mitigation measures  | In person with strict mitigation measures after cleaning/contact tracing (4)   | In person with strict mitigation in affected buildings with cases after an appropriate pause (5)  |
|                                     | A   | In person with strict mitigation measures   | In person with strict mitigation measures after cleaning/contact tracing (4)   | In person with strict mitigation in affected buildings with cases after an appropriate pause (5)  |
|                                     | B   | In person with strict mitigation measures   | In person with strict mitigation measures after cleaning/contact tracing (4)   | Consider reduced density in affected buildings with cases after an appropriate pause (5)  |
|                                     | C   | In person with strict mitigation measures. Discuss additional innovative mitigation strategies with the local health department.  | Consider reduced density in affected buildings after cleaning/contact tracing (4). Discuss additional innovative mitigation strategies with the local health department. | Consider reduced density in affected buildings with cases after an appropriate pause (5). Discuss additional innovative mitigation strategies with the local health department. |
|                                     | D   | Consider reduced density with strict mitigation measures. Discuss additional innovative mitigation strategies with the local health department.   | Consider reduced density in affected buildings after cleaning/contact tracing (4). Discuss additional innovative mitigation strategies with the local health department. | Consider remote instruction in the affected building(s) 28 days.  |
|                                     | E   | Consider appropriate pause (14 days) of in person instruction in entire district to discuss additional strategies for protecting student and staff, including but not limited to testing strategies | Consider remote instruction in entire district   | Consider remote instruction in entire district  |
