

CALHOUN CITY SCHOOLS

a tradition of excellence

Each school and school system is required to have emergency plans that protect students, staff, and campus visitors. Each Calhoun City School has developed their plans with the coordination of the Department of School Safety and Gordon County Emergency Management. School Safety Plans include but are not limited to the following planning;

- Fire evacuations
- Tornado and severe weather drills
- Lockdown procedures
- Emergency school closing
- Shelter in place
- Outdoor activities / extreme weather
- Biological, Radiological and Chemical spills and threats
- Visitor access to the facility
- Staff training in First Aid and CPR

These plans also include planning for complete campus evacuation and parent reunification should the need arise. For the safety and security of students and staff members the exact location of these reunification sites will be disclosed to parents when students are safely transported to that location. The goal of school safety planning is to protect every student, staff, parent and other campus visitor.

Your school principal will be happy to discuss the general safety plans with you. For safety reasons, specific details of some portions of the school safety plans will not be publicly revealed.

Each school performs a review of the safety plan each school year. This document evaluates the safety and security practices for each school site.
