

Dear Parents and Carers 11.1.21

We hope that you have enjoyed the first week of remote learning. We have been so impressed with all pupils (and parents) engagement, resilience and patience this week with what is a very difficult time for all.

The Academy will continue to be closed this week. Lessons will be delivered online for most and in class for some children. Our days will be planned so that all children are receiving the same lessons whether they are in the academy or at home as much as we can. Please keep an eye out for messages as they are updated. Lesson details will be loaded on Purplemash and set as "To Do"

English

In English this week the children will be designing their own souvenir for Bob to sell on his stand. We will be taking a virtual trip to the moon, generating adjectives and adverbs to describe our experiences and writing a postcard to a friend or relative telling them about our moon adventure!

Maths

This week we will continue adding 2 digit numbers. We will use our knowledge to solve missing number problems. We will use part, part, whole and bar models to support addition calculations. We will solve addition calculations in word problems.

Wider curriculum

Within learning journey we will continue learning about significant great explorers. On science we will be carrying out an investigation into the dunkability of biscuits. If you are learning remotely, please can you have a few different biscuits and some warm water for the lesson on Friday afternoon (if you can!)

Sounds Write

This week we will continue spelling and building words containing the sound /o/ We will practice the different ways to represent the sound - o and a. Please practice the following words and generate other words with these sounds: what swamp want shopped flop stopper

Look out for the assigned mathematics and rock stars times tables.
