## CONSTRUCTION PROGRESS

WATCH LIVE

To watch construction of the new 2019 Rochester Public Schools Middle School and Elementary School in real-time, you can access the **OxBlue webcam link** here: <https://app.oxblue.com/open/knutson/RPS>

or **scan the QR code** with your mobile device camera.

## THIS MONTH'S ACTIVITIES

- Daily COVID screening for all who enter site located in job trailer.
- We will be using ground thaw & heaters to prepare the gym for slab on grade pour.
- Pre-cast concrete (including wall panels and second floor concrete) will be ongoing for the next month.
- Structural steel was partially delivered in December and will have ongoing deliveries throughout the month of January.

### Fun Fact:

When ran at maximum capacity, a ground thaw machine burns through 8 gallons of fuel per hour. At that rate, it will take 10,000 hours to provide enough fuel for 1 day on an average cruise ship.

### Photo Descriptions:

- Left - Setting precast walls using pipe braces & cranes
- Middle - The underground work is complete, and the layout of the building is shown
- Right - Overview of the entire school lot
