

Review for Change of Placement

As a part of the scheduling and registration process at Maryville Junior High School, teachers are required to make recommendations for student placement in many of our courses. Teacher recommendations are based upon the observed performance of each student. Teachers are not to recommend a student for a course if they feel the student in question does not have a reasonable opportunity for success. The examination of past teacher recommendations indicates a very high degree of accuracy resulting in appropriate student placement.

It is our understanding of the following:

Your student: _____ Grade: _____

Received a recommendation for: _____

You would like for your student to be in: _____

Please acknowledge with your signature below that this change would be made without a teacher recommendation. Your signature below indicates that you understand the school's recommendation policy and that you will accept responsibility for the placement indicated above. Based upon your student's past performance, the school staff does not consider this course to be an appropriate placement. Students normally will not be permitted to return to the recommended course after this change has been made.
