Sun Prairie West High School EXECUTIVE SUMMARY

PROVIDED BY FINDORFF

2850 Ironwood Drive • Sun Prairie, WI 01.21.2021

Overview

The cold and the snow can't slow the great progress out at Sun Prairie West High School! Overall focus on the project continues to be completion of the structure, though interior rough-ins are starting to be put in place at the Learning Communities.

Masons continue block walls at the Kitchen and Loading Dock, the Pool, and lobby west of the Auxiliary Gym. Also, the first bricks are being laid for the exterior façade!

Roofing at the Learning Communities is about 50% complete, and progress continues eastward at this section of the building. Exterior spray foam and window installation are also continuing.

Ironworkers have shifted their efforts from the Performing Arts Center (PAC) to the kitchen and will move on to the Commons area next.

Ironworkers erecting steel columns and beams in the Loading Dock / Kitchen area.

Update

- Masonry block walls at south side of Pool and west side of Auxiliary Gym are ongoing.
- Exterior and interior stud framing and sheathing is continuing at the Learning Communities
- Roof joists and decking is being finalized at the Learning Communities.
- Roof joists and decking in the PAC have been completed
- Geothermal well drilling continues

Looking Ahead

- Exterior insulation, windows, and veneer continues at the Learning Communities
- Exterior steel stud walls and sheathing on east side of Learning Communities continues
- Roofing at the PAC
- Steel structure at the central Commons area

Above ceiling rough-ins are underway, along with insulation and framing at the 3rd Floor of the Learning Communities

DID YOU KNOW?

Findorff's crawler crane, the red Manitowoc 10000A-1 crane, is what we use to hoist structural elements (steel, precast) of our projects and maneuver them into position to be set in place. This crane has a 200' long boom and has the lifting capabilities to pick up roughly 100 tons!
