

# DIGITAL DIALOGUE STRATEGIES

Participation in online chats and forums is a central part of remote and virtual learning. Instead of just posting a response of *I agree*, or *Good idea*, try using one or more of these strategies:

## Notice

What stands out to you or catches your eye in this person's post? In other words, what do you notice in particular? Be specific.

*Example: I noticed you said \_\_\_\_\_ and it makes me think....*

## Probe

Probe for more details. Ask questions that will help give you a better sense of another person's perspective.

*Example: Could you provide more detail? I'm still unclear about what you mean when you say \_\_\_\_\_.*

## Snip

Cut and paste a phrase or sentence from the original post into your comment. Ask a question about it or say what you find interesting about it

## POV

Express your point of view (POV), position, or opinion

*Example: I disagree because... or I agree with \_\_\_\_\_ because...*

## Challenge

Question or challenge a point of view (POV) or idea someone shared

*Example: I'm wondering if...*

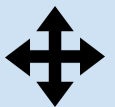

## Connect

Make a connection between something in the post and your own experience, feelings, or interests.

*Example: This reminds me of... or I agree with \_\_\_\_\_ because...*

## Extend

Describe how the post extended your thoughts in new directions or gave you a new perspective

*Example: Your post helped to extend my thinking because...*

## Appreciate

Share what you like, appreciate or value in the post you've read. Be specific.

*Example: I liked what you said about \_\_\_\_\_ because...*
