Using the information above we would like you to draw a line graph showing this information. We have rounded the times to the nearest half an hour to make it a little easier for you ☺.

When you have drawn the graph, have a go at the following questions:

1) Which month has the most amount of daylight?

2) Which month that has the least amount of daylight?

3) What patterns are there in your graph? Explain what you notice.

4) What is the difference in the amount of daylight in June and January?
