

UK SPACE
AGENCY

Our Brief:

Design and make a meal for astronauts to have on the International Space Station (ISS).

I must make sure the meal:

- is suitable to be eaten in space, e.g. easy to serve, no crumbs;
- is attractive and tasty for the astronauts;
- is British themed, e.g. ingredients, based on a local/traditional recipe;
- is something the astronaut could share with his/her crewmates in space.

Note: The astronaut's meal can include a starter, a main course, a dessert and a drink.

Our designs for the astronauts:

Reasons for choice:
