CONSTRUCTION PROGRESS

WATCH LIVE

To watch construction of the new 2019 Rochester Public Schools Middle School and Elementary School in real-time, you can access the **OxBlue webcam link** here: <https://app.oxblue.com/open/knutson/RPS>

or **scan the QR code**
with your mobile device camera.

PAST MONTH ACTIVITIES

- Daily COVID screening for all who enter site located in job trailer
- Roughly 1/3 of the concrete footings have been poured
- Backfilling is ongoing as the concrete pouring continues
- Finished foundations in Area A (North side of the school) with three more areas to follow

Fun Fact:

There has been approximately 1,000 yards of concrete poured since the start of the project. This equals the length of 35 high school basketball courts!

Photo Descriptions:

- Left - Mass concrete footing which measures 16' wide and 2.5' thick. This wall holds up the auditorium next to the loading dock.
- Middle - North side of the 20' tall, 16" thick concrete retention wall that separates the lower level classrooms from the main level auditorium.
- Right - The crane on the left-hand side of the photo is at the finish floor elevator of the auditorium. To the right of the footing will be the lower level mechanical room.
