One of the best ways to offset the rising costs of education is prudent investments in quality common stocks. A well-managed portfolio has historically demonstrated an ability to increase in value in relation to increased education costs.

The RISING COST of a year at College

The average cost of a year at college has more than doubled since 1940! Tuition rates have increased at an even greater rate than day to day living expenses.

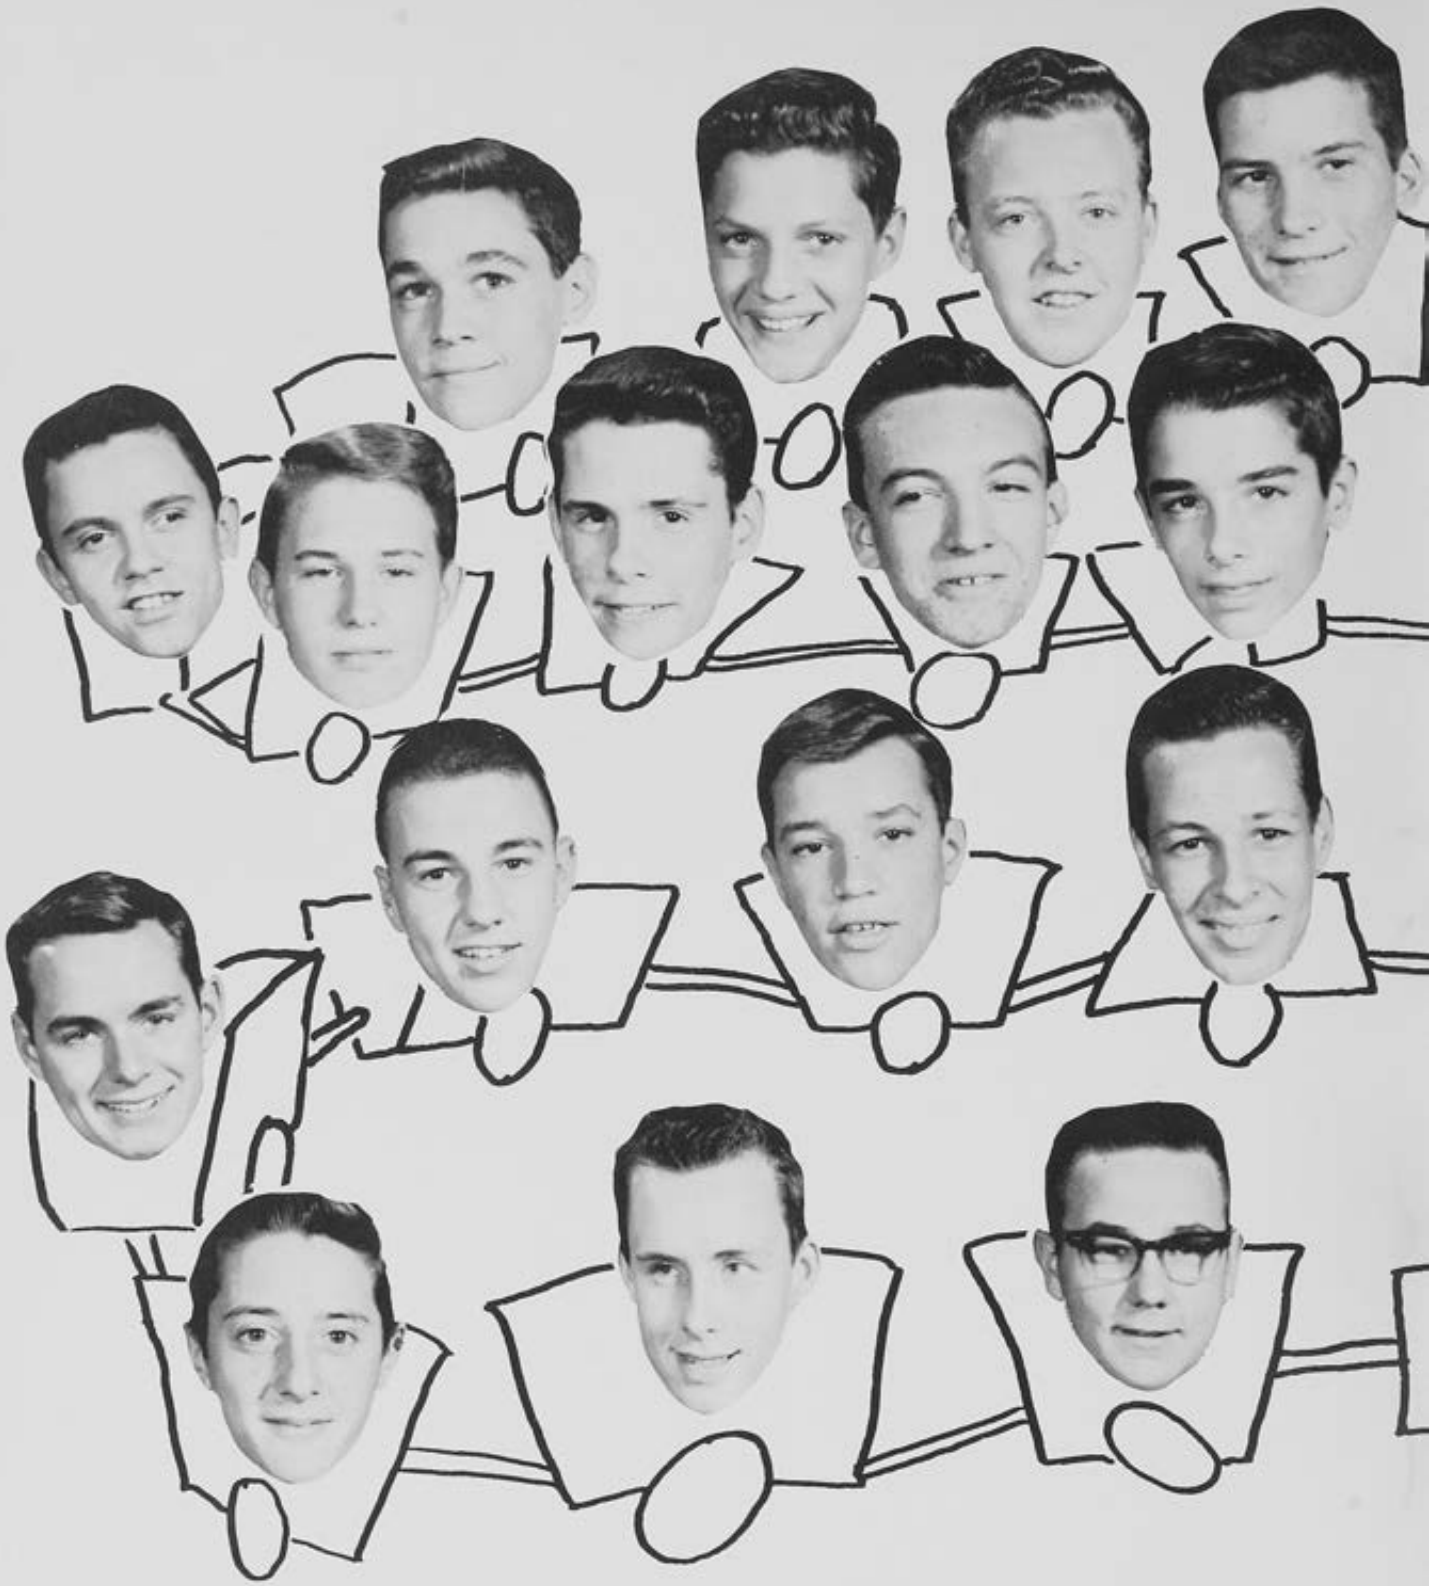

The effect of this trend: The younger your children or grandchildren are now, the more likely that college costs will be *still higher* when the time comes to pay them.

TREND OF TYPICAL ANNUAL COLLEGE COSTS

	Harvard College		University of Iowa		Columbia University		Stanford University		Vassar College		Average 5 Colleges	
	Tuition Only	Aggregate Cost*	Tuition Only	Aggregate Cost*	Tuition Only	Aggregate Cost*	Tuition Only	Aggregate Cost*	Tuition Only	Aggregate Cost*	Tuition Only	Aggregate Cost*
1940	$ 400	$1,200	$ 100	$ 500	$ 380	$1,100	$ 300	$ 950	$ 500	$1,550	$ 336	$1,060
1945	400	1,350	130	720	380	1,500	345	1,050	550	1,600	361	1,244
1955	1,000	2,150	202†	1,100	816	1,916	750	2,000	925	2,400	739	1,913
1962	1,520	2,980	290†	1,400	1,450	2,670	1,260	2,705	1,325	2,900	1,169	2,531

** These "typical" yearly cost estimates allow for little more than bare necessities. But they will differ for individual students. For example, travelling costs or a fraternity initiation might each add $100, $150 or more. † Maximum to Iowa residents, non-residents' tuition is higher.*
