

STEM Heroes February 2021

# All Female Crew for Air India's Longest Flight

Achieved 11<sup>th</sup> January 2021

- The team of female pilots flew 16,000km from San Francisco to Bengaluru in the longest continuous flight by Air India.
- The flight took 17 hours at an altitude of 37,000 feet and saved 10 tonnes of fuel by not having to stop en route.
- "It will be a historic flight and the longest to be operated by all women crew," Ashwini Lohani, the CMD of Air India, said. "The airline has immense respect for women and it would be a symbol of women empowerment."
