

POS & PIN Numbers

All students use their unique district student I. D. as a "pin number". This "pin number" allow students to access their individual account.

When the student inputs their number the computer system accesses his/her account and determines the amount due depending on the money that has been pre-deposited on account or the child's meal benefit status.

It is used each day in the cafeteria and for payments on lunch accounts.

To help the serving lines move faster and allow more time for students to eat, children should memorize their PIN number.

Please practice your children's PIN numbers with them at home.
