Cori Crandall- Parent
Rick George- Parent- Vice Chairman

Business

Review November Meeting Minutes - Racquel Knavel

Follow up about the student safety video- Ms. Knavel's class will collect data and create a video soon to send to parents.

“Davis Learner Profiles” Tyson Grover, STEM Director

Discussion as a community council about the expectations elementary school students should be communicating competently by the end of 6th grade.

“SIP” School Improvement Plan- Now referred to as “TSSP” Teacher/Students Success Plan

Science core curriculum does not have quantitative data, we can gather information through surveys and observations.

Reading goal progress for this year's TSSP is unique due to the pandemic and the lack of regular school schedules this year and last. We anticipate that the gaps will be filled, and the teachers are working hard to catch students up.

Next year's TSSP goals to consider will be discussed at the next meeting.

Middle of Year Acadience Data- Angie Mahan, ELA Coordinator

The overall school reading growth is improving. Growth is comparable to last year. The district is looking into “the science of reading” and will train K-3 teachers with this particular teaching method in order to support the goal of helping students reach benchmark proficiency and improve growth rates.

Next Meeting:

March 9, 4:00 pm
