## Four Pillars of Belonging

### Connectivity

- Connection with a group or institution
- A sense of caring for others and being cared for
- Essential for individuals expanding potential both personally & academically

### Relationships

- Ties with other individuals
- Empathy, respect, positive regard & interest
- Glue that holds our school community together

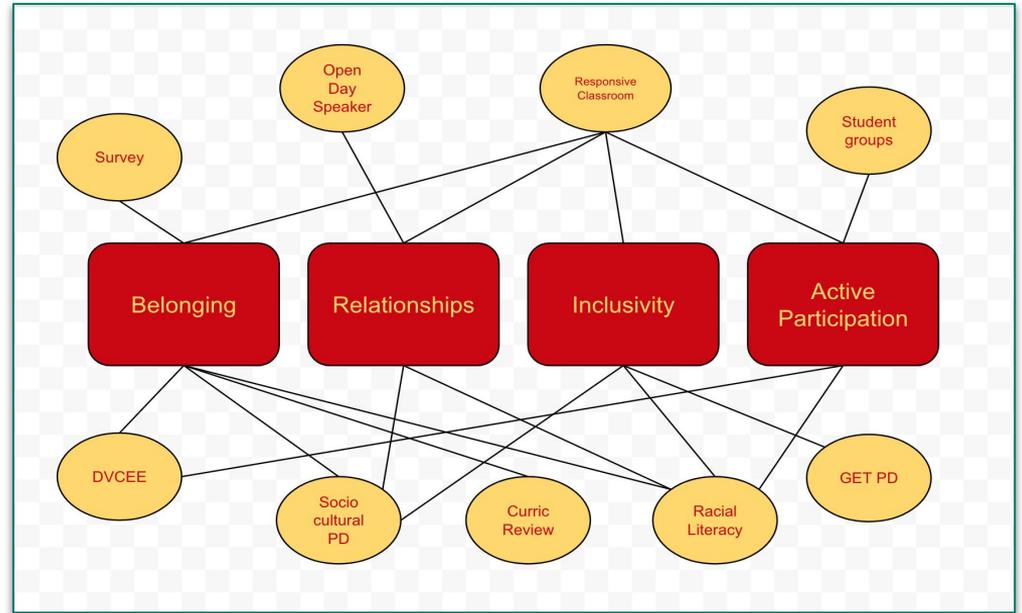

### Active Participation

- Individuals taking part in school life & contributing meaningfully to our school community
- Leads to students believing they can make meaningful contributions & thereby feel respected & engaged in the school

### Inclusion

- Willingness to form relationships with people similar & different from you
- Inclusive schools support & affirm all school staff, students & their families
- Involves embracing the diversity within the many socio-cultural identities that exist within our school community

“Put another way, **diversity is a fact** (the numbers are what they are), **inclusion is a choice** (you decide whether to include someone or not), **but belonging is a feeling that can be enforced by a culture that you can purposefully create.**”

# Transition to Strategic Goals

Original goals of the BASIS work:

1. Identify and develop programs and practices for improving school climate and enhancing school culture
2. Identify process to provide training throughout the District to all staff members

## 2020-2025 District Goals

### **Social/Emotional Wellness**

Produce a community of empathetic and resilient learners with skills to socially and emotionally flourish

### **Prepare Contemporary Citizens**

Modernize and expand learning experiences to prepare students as critical thinkers, problem-solvers, innovators, and designers within a complex, global society.

### **Diversity and Inclusion**

Establish a culturally diverse and inclusive educational experience that develops socio-cultural proficiency.

During my early days as a teacher when I thought about Mrs. Morris, I realized that culturally responsive relationships aren't just something nice to have. They are critical. The only way to get students to open up to us is to show we authentically care about who they are, what they have to say, and how they feel. Building a culture of care that helps dependent learners move toward independence requires what I call a learning partnership. Gay (2010) points out that caring within a culturally responsive context automatically places teachers in a different kind of emotional and
