

Plastic Bottle LED Tea Light Candle Holder

You will need:

- Small plastic bottle
- PVA glue
- Tissue paper in several different colours
- Scissors
- LED tea light candle

1

Cut the bottom of the plastic bottle off, about one third of the way up.

2

Decorate the whole of the outside of the plastic bottle using tissue paper stuck on with PVA glue. Then cut out a shape, such as a flower or heart, and stick this on. Leave to dry.

3

Once dry, paint a very thin layer of PVA glue across the top of the design to seal it and protect it, then leave to dry.

4

Once completely dry, the candle holder is ready to use. Put an LED tea light candle inside; this should illuminate the pattern on the candle holder.

Plastic Bottle LED Tea Light Candle Holder

You will need:

- Small plastic bottle
- Tissue paper in several different colours
- PVA glue
- Scissors
- LED tea light candle

Step 1

Cut the bottom of the plastic bottle off, about one third of the way up.

Step 2
