

# Paper Doily Flowers

## You will need:

- Water
- Paint brushes
- Paint pots
- Several colours of paint
- Green pipe cleaners
- Ribbon
- Scissors
- Paper Doilies
- Double sided tape

1

First, make a colour wash by mixing a small amount of paint with some water. Repeat this process with a few different colours.

2

Spread out the paper doilies and colour wash them using the paint mixes, then leave to dry.

3

Take one of the paper doilies and use scissors to make one cut from the edge of the doily into the centre.

4

Taking one side of the cut, roll the paper doily tightly against itself at the middle, allowing the edge to become less tight.

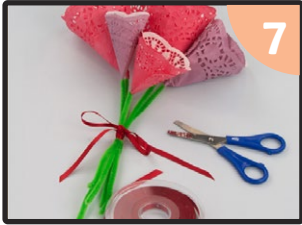

5

Using a small square of double sided tape, secure the edge of the paper doily against itself.

## Paper Doily Flowers

Using a pipe cleaner pushed into the base of the flower create a stem, securing with double sided tape.

Repeat steps 3 to 6 with the other doilies. Then, put all of the paper doily flowers into a bunch, tying them together with ribbon around the stems.
