

ST. ANDREW'S
SEWANEE

The Tim Graham Trail System

St. Andrew's-Sewanee School's 550-acre campus serves as home, laboratory, and recreational facility to the school's 220 boarding and day students. Access by the public to our 13 miles of hiking and mountain biking trails is limited to special events or by special permission.

For more information about St. Andrew's-Sewanee School or campus-use policies, contact the Office of Communications & Marketing (sbergman@sasweb.org, 931.636.5535).

The History of the Trails

The campus trails were created largely through the efforts of SAS parents. In 1999, the first part of the Bob-cat Trail was cleared during a Spring Clean-Up Day. Mountain Biking Coach Speed Baranco spearheaded the planning, clearing, and bridging of many miles of new trails, assisted by his wife Sian SA '72 and son Matthew '15.

Over the years parents, faculty, staff, and students joined in the effort to clear and maintain the trails. Members of SAS Scout Troop 14 made trail improvements for their Eagle Projects: Sean Dalton '00 constructed a bridge spanning the creek that connects SAS to the University's Shakerag Trail; Nicholas Baranco '04 built Mountain Lion Lane; Derek Street '04 constructed the boardwalk at the trailhead of the Otter Limits Loop; and Zach Huffman '09 completed the perimeter loop with the construction of Eagle Trail; Seth Burns '11 constructed the boardwalk on the trail connecting Deer Track to the Piney Point Trail, and Ethan Burns '11 built part of Salamander Meander. Many of the trails are named for animals that have been spotted on or near campus. Yes, even the mountain lion!

In 2021, the trail system was renamed in memory of Tim Graham, longtime and beloved Director of Development.
