

GUIDELINES FOR EARLY DISMISSAL DUE TO ILLNESS

TIRANA INTERNATIONAL
S c h o o l

Students with any of the following health issues should be sent to the school Doctor's office to be evaluated. It is mandatory that the student be sent home early from school if any of these issues are present.

EARLY DISMISSAL OF A STUDENT IS INDICATED WHEN:

- He/she has fever 100 °F (38 °C) or higher.
- He/she has diarrhea 2 or more times throughout the school day.
- He/she has one or more episodes of vomiting due to illness.
- He/she has a disruptive cough and constant runny nose with a yellow/green tint.
- He/she has a rash (body and/or face) or pus-filled blisters that suggest a possible skin infection.
- He/she has symptoms of an eye infection with redness, itching and/or eye drainage.
- He/she has a newly diagnosed case of lice.

Special circumstances may arise and it will be up to the discretion of the school Doctor to decide whether or not early dismissal is indicated. The student's parents will be notified of the decision and general recommendations will be given.
