Dear Parents

As your child's school doctor, I want to remind you of the importance of getting your child vaccinated before school start. Vaccines are the best way you can protect your child from a number of serious diseases, including meningococcal disease, whooping cough, etc.

As you are making your back-to-school checklist for your child/children , I encourage you to make sure they get all the vaccines that are recommended for their age.

Protect your children and talk with your child's clinician about what vaccines they need. You may also contact the school doctor with any questions.

Sincerely,

Valbona Selmani MD
School Doctor
Tirana International School.
