## Coronavirus: One Great Struggle

---

10 March 2021

By William P and Daniel M, 7W

The Coronavirus has been a struggle for everyone however for many communities it has brought them together. This article shall be telling you about how out of this crisis came a shining light.

As we all know the virus is terrible and that it has changed our perspective of the world. For example, our children's education has been hard because of them being at home, not seeing their friends, not having any sport.

Another terrible thing is that small businesses are being forced to shut their doors with a terrible feeling of uncertainty over whether they will be able to let customers back into the shop.

However the companies most heavily hit are airlines: a whopping 43 commercial airlines ceased all operations, all because of a global pandemic.

This news report is just telling you the true destruction of the COVID-19 pandemic and remember to listen to the COVID measures.

However, not all is bad. As an example in my community we have helped our elders a lot more as they cannot leave home and go to the shops to buy food.

These small things have changed our feelings for one another and made us realise how important it is to help each other in our lives.

STAY SAFE. PROTECT THE NHS. SAVE LIVES.
