

Prekindergarten Mathematics - What Your Child Will Learn

In **Prekindergarten** your child will focus on learning numbers and what numbers represent, learning about addition and subtraction, sorting and identifying shapes. Instructional activities may include:

- Counting objects to tell how many
- For any number 1 to 5, finding the missing quantity that is needed to reach 5
- Counting how many objects are in a group and comparing the quantities of two groups of objects
- Comparing two numbers to identify which is greater than or less than the other
- Understanding addition as putting together/adding to and subtraction as taking apart/taking from
- Representing addition and subtraction word problems using problems using objects, fingers, mental images, drawings, sounds
