

What Your Child Will Learn in Elementary School Science

The following chart identifies the units to be taught during each quarter. Due to the variation of materials and the configuration of teachers assigned to teach science, the order of units within a grading period may vary from teacher to teacher within a grade level at a school.

Prekindergarten

First Quarter	Second Quarter	Third Quarter	Fourth Quarter
• Weather	• Physical Properties	• Living Things	• Life Cycles

Science at the prekindergarten level is all about observations and language. Students will make observations and talk about them with their peers. There are no assessments in prekindergarten.

Students will record and discuss the weather. They will learn about the physical properties of objects in their world. They will learn about the needs of living things and look at cycles in nature.
