- Your child's achievement is our mission. We provide the highest quality, individualized ABA therapy for children with autism.
- Our Day Program is geared specifically to deliver optimal outcomes for young learners. All children enrolled in this program will receive 30 hours of Applied Behavior Analysis (ABA) therapy per week in a clinic setting.
- Our After School program is geared to help school-aged children improve communication, increase awareness and reduce challenging behaviors through 1-on-1 and group therapy. Our program ensures our children and teens receive 10-15 hours of valuable therapy each week. After a comprehensive assessment of your child's skills and abilities, we create a customized treatment plan to address a range of foundational skills based on their unique needs.
- Our programs are created to provide support not only for children, but also for parents. We take a partnership approach with your family to ensure we are guiding your child to their highest potential.
