

RESTORATION AND SUSTAINABILITY PRACTICUM: Restore 525 STUDENT APPLICATION

RESTORATION AND SUSTAINABILITY PRACTICUM: Restore 525 - is a unique opportunity for students to serve God's Kingdom by finding meaningful solutions to agricultural, economic, and educational problems within impoverished communities. This year's course will be part of Covenant Day School's longstanding commitment to mission work in Haiti. A strong team of students will specifically engineer and develop a large community aquaponic system at Mission of Hope International in Grand-Goâve, Haiti. Each student in this class will play a unique and critical role as part of a multiyear strategic plan to develop a large-scale aquaponic industry. Students will engage in a range of class activities such as brainstorming sessions, architectural designing, business and marketing management tasks, STEM research, cultural research, an international trip to Haiti, and much more. This course is essentially a training ground for students to discover, cultivate and apply diverse gifts and passions toward Christ-centered restoration.

IF YOU HAVE ANY QUESTIONS, PLEASE SEE MRS. L. HARLING (Room 211)
