

Critical Thinking, problem solving, and reasoning...who knew they could be so much fun! Students have the opportunity to design, create, and build while finding ways to solve a variety of unusual and challenging problems. The stage is set for each lesson with a creative scenario in which students must find a solution. There is no right or wrong, just creativity and imagination.

Collaborative exploration is front and center in this immersion into STEAM-based activities. Using design-based thinking, students will explore science, technology, engineering, art, and math in ways that challenge the way they think about the world in which they live. It's STEAM-based thinking in the making!

Take an odyssey through space and time! Students experience space...the final frontier...as they discover some of the most amazing and mind-boggling intergalactic discoveries and out of this world ideas of the century.

Students will explore and discover the many uses of math and numbers through creative, exciting, hands on activities involving practical, educational and life applications. All heroes don't wear capes! Some carry calculators!

It's time to play! Kid Fit club will allow students to express themselves through interactive, physical activities. Every student will engage in activities such as kiddie pool kickball, volleyball and much more! Are you ready to burn some energy?

A compendium of unbelievable, astonishing and bizarre oddities, Strange But True is filled with mind-boggling locations, bizarre feats, strange stories, and incredible facts designed to create sensory overload! Ever seen a 28-toed cat, blue lava spewing from a volcano, or an invention that grinds up bugs for human consumption? It's the most marvelous, scariest, funniest, and weirdest wonders ever to be declared "Strange But True."

Express Yourself provides seemingly endless opportunities for students to creatively explore the many different facets of art. Whether inspired by music, acting, art, or other artistic genres, students will have the opportunity to express themselves in unique and sometimes unexpected ways.

Students will create, explore and engage in hands on arts and craft activities throughout the summer. Creative Hands will stimulate their imaginations, inspire unique workmanship, develop projects, and explore artistic expression. Students will also learn about past and present artists while having fun creating their own masterpieces!
