
Student Services Report

November 2020

The annual student count period has ended. The district-wide K-12 student count declined slightly from the beginning of the count period at 363 to the end of the period at 359. With the drop in enrollment, we'll still be close to the ADM during count last year (362). The attached enrollment numbers are consistent with the end of the count period.

The district is currently rolling out a new notification system through PowerSchool, SwiftReach. At this point, the system has been tested and used with a district-wide notification and an Aniak notification. The system allows for mass text messaging from activated users. This access is beginning with the administration but will eventually be set up for teachers to message parents as well.

During October, I attended the virtual Alaska Association of Career and Technical Education (ACTE) Conference. This was a great opportunity for me to begin networking with the CTE professionals within Alaska. It showed some of the possibilities with virtual CTE training when in-person training is unreliable. I also learned more about the EdRising program. A program designed to help communities and schools grow their own educators.

Alaska Excel

Similar to their first-semester online course, Career Building, Excel plans to continue with and extend their online course offerings. The Career Building course gave students general post-secondary preparation and job readiness skills. The additional second-semester classes will be more focused on introductions to individual careers. In a continued effort to extend their ability to serve students, they're developing delivery methods for the courses that will not be as reliant on the internet.
