Speaker Series

REBECCA KAMEN

on Crisis, Curiosity and the Creative Process

Thursday, April 8

7 p.m. on Zoom

This presentation explores how crisis, curiosity and the creative process not only generate unexpected opportunities for discovery, but also inform artwork which fosters new connections between art and science.

[RSVP Online Here](#)

Rebecca Kamen spoke at Visitation in 2017 on the intersection of art, science, and spirituality. We're delighted to welcome her back to share her recent research and insights with students, faculty, staff, families, and alumnae - all are welcome!

Rebecca Kamen, sculptor and lecturer on the intersections of art and science, seeks 'the truth' through observation. Her artwork is informed by wide-ranging research into cosmology, history, philosophy, and by connecting common threads that flow across various scientific fields to capture and re-imagine what the scientists see.

Kamen has exhibited and lectured both nationally and internationally. Currently, Kamen is investigating the dynamics and poetics of curiosity and the creative process in her work as artist in residence in the Computational Neuroscience Initiative at the University of Pennsylvania.

Sponsored by the St. Jane de Chantal Salesian Center
