OSSD ADDS ELECTRONIC TEMPERATURE SCANNERS TO ALL SCHOOLS

OCEAN SPRINGS, MS (OSSD) -- Ocean Springs School District has added electronic temperature scanners to all district facilities, with the help of Paul Stein and Stein LTC Group.

The electronic temperature scanners help accelerate the screening process for students and staff members, allowing for more efficient use of the instructional day. The temperature scanners use a camera to detect a student's temperature from up to four feet away, eliminating the need for any in-person contact with the device, or a human conducting temperature screenings.

The district's upgrade to electronic temperature scanners could not have been possible without the generous contribution of Mr. Paul Stein of Stein LTC Group. Mr. Stein donated two temperature scanners to OSSD to test the effectiveness in a school setting, which led to the purchase of one for each campus and facility.

"The temperature scanners have been a tremendous asset for us, as they have allowed us to speed up our entry processes at various points through the district," Grant Dickinson, Director of Student Services, said. "It has relieved a lot of other personnel of some of their duties and allowed us to focus our attention on welcoming the students to campus and making them feel safe."

Every student, employee, and visitor that steps foot on any OSSD campus must pass a temperature check, and sign off on not having any COVID-19 symptoms as part of a daily routine.

About Stein LTC: Stein LTC is a full service provider with companies that encompass all segments of the long term care industry. Stein LTC now proudly serves over 90 facilities and continues to grow into new markets. For more information, visit steinltc.com.
