

Insights into your students' learning

Meaningful assessment is about more than numbers. It provides deep insight that helps you monitor student progress and close learning gaps.

Cognia Formative Assessments give you evidence of student learning while instruction occurs, so your teachers can adjust instruction immediately. All members of the Cognia™ Global Network have access to downloadable formative item sets, scoring information, and alignment charts.

Cognia Interim Assessments reveal students' progress toward end-of-year goals three times during the school year. Interactive score reports show students' grasp of specific sub-content areas. And eighth-grade reports give a direct link to the score scale of SAT® Suite of Assessments from The College Board® for early indication of college readiness.

Join the Cognia Global Network

Membership with Cognia provides an essential package of tools, resources, and services to drive continuous improvement, support accreditation, and get evidence of student learning. Three levels of membership give you options to best align with your institution's goals.

Premium-level membership expands your assessment solutions with online administration, delivery, and reporting for our Formative and Interim Assessments. You can administer these assessments to all your students in grades 3–8 with no additional cost.
