MN Student Survey 2013

The Minnesota Student Survey (MSS) is a triennial survey of young people regarding a variety of risk and protective factors. The survey asks young people questions about their activities, opinions, behaviors and experiences. It includes questions on an array of issues, such as substance abuse, school climate, violence and safety concerns, healthy eating, out-of-school activities, connections to school, community and family and many other questions. The survey is administered in schools, alternative learning centers and juvenile correctional facilities. The purpose of the survey has been to:

- Provide data for program planning and evaluation.
- Meet state and federal student survey requirements.
- Address relevant issues confronting students.
- Mark trends over time.
- Involve schools/other educational settings statewide and provide data for local use.

The following is a summary of Austin Public School MSS data related to **School Safety**, **Student Engagement** and **Connection at School**.
