

LEARNING ANALYTICS COLLABORATIVE

The **Learning Analytics Collaborative** is a partnership between educators, data scientists, and visionary leaders from schools around the world seeking to harness the power of learning analytics to better understand learners and their learning context in our efforts to improve and transform schools.

MEMBERS OF THE COLLABORATIVE HAVE ACCESS TO:

A rigorously developed, customizable and secure Learning Analytics platform.

Professional Development on building Data Literacy for school leaders and faculty.

Personalized Student Profile Dashboards that capture achievement data and other forms of human development data. All of these can be customized for your school or organization.

Access to scales, surveys, and instruments developed and used by members of the Learning Analytics Collaborative.

Dynamic data visualizations for analyzing, sharing, and generating data-informed questions and actions.

Learning Analytics Created for Educators by Educators

FEATURES OF THE PLATFORM

Secure

GDPR Compliant.
Data is never shared between members or used to aggregate, or benchmark with other schools

Integrated

Integrates with your Student Information System, Google Suite, and more...

Customized

A rigorously developed, customizable, and secure Learning Analytics platform (including instructions, professional development, and developmental support)

Iterative

Forever Beta. Access to data scientists who build dynamic data visualizations for analyzing, sharing, and generating data informed questions and actions

Collaborative

Sense making of learning data across member schools and time, based on the sharing of insights and outcomes emerging from the use of the platform

Evolving

An evolving suite of researched and development tools for assessing the effectiveness of data use in your own teaching and learning context

THREE KEY WAYS THE LAC ADDS VALUE

All your Data Visualized in one Place

to inform productive conversations about learning and learners.

International School Context providing evidence you need

to support key decisions requiring investment of monetary or professional capital.

Longitudinal, cross-sectional, and intersectional metrics -

to help you critically evaluate systems, manage complexity and identify areas of improvement and set goals
