

Providing Accommodations in a Virtual Environment Educator Webinar: Recordings and Resources

The Florida Diagnostic and Learning Resources System presented a webinar for educators to learn more about providing accommodations for students in a virtual environment. While providing instruction to students with Individual Education Plans and Section 504 Plans in a virtual environment, it is important to continue to provide them with the necessary accommodations so that they can continue to be successful. This webinar provided examples of possible digital accommodations that can be used in virtual instruction based on the student's current accommodation needs. Ideas were discussed for documenting and accessing the implementation of digital accommodations.
