

# LEARNING AND THERAPY CORNER

BUILDING STRONG FOUNDATIONS AND BRIGHT FUTURES

The Learning and Therapy Corner is a pediatric private practice specializing in speech/language pathology, occupational therapy, and psychological services. The specialty areas that we are trained in allow us to work with the teachers and students in a variety of ways. As speech-language pathologists, we are able to focus on the area of speech and language development as well as phonological awareness. We can identify children that may need help in these areas as well as provide teachers and staff with recommendations to stimulate appropriate speech sound development, expand receptive and expressive language skills, and increase foundational pre-reading skills using a fun and effective approach. Our occupational therapists can help support successful fine motor, gross motor, and visual motor development through providing hands-on assistance within the classroom. We can facilitate and provide creative activities within the classroom and to staff members to aid in motor skill development and enhance sensory processing and integration skills. A psychologist will be beneficial to the school by providing both behavioral consultations and skills training sessions (social skills and coping skills). Our psychologist will work with the St. Paul's Preschool staff to create interventions that are both family and school friendly. In addition, our psychologist will be available to discuss pre-academic and/or social, emotional, and behavioral concerns that may require further evaluation. The ongoing collaboration between our therapists and the teaching staff will benefit all children by modifying and adapting classroom activities as needed to ensure a successful learning environment for each and every child.

The Learning and Therapy Corner is unique in that we offer complementary disciplines under one roof, which will now be offered at St. Paul's Preschool. Our ability to enhance the school setting, children, and teachers as a multi-disciplinary team is unrivaled.

All of the therapists at the Learning and Therapy Corner are doctoral or master-level educated and continuously pursue higher education. We will be supporting both the teachers and children at St. Paul's Preschool. Our work at St. Paul's Preschool will be treated with the utmost confidentiality and abide by all HIPAA regulations. We look forward to lending our professional expertise to all the families at St. Paul's Preschool as your children build their foundational learning skills for future success.

Thank you!

Megan Lekas, MS, CCC-SLP

Laura Rosenberg, MS, OTR/L

Kristin O'Donnell, PhD, NCSP
