

## **PRESS RELEASE – LSU Health Shreveport COVID-19 vaccine schedule through April 24**

April 14 – LSU Health Shreveport continues to offer access to COVID-19 vaccinations at variety of locations and times throughout Northwest Louisiana. The large-scale COVID-19 vaccine distribution site will be offering vaccinations to the community throughout the month of April. Eligible Louisiana residents include individuals 16 years of age and up. **Those ages 16 and 17 may ONLY receive the Pfizer vaccine, but those 18 years and up may receive the Pfizer or Moderna.** As per CDC and FDA recommendations, LSU Health Shreveport has chosen to pause offering of the Johnson and Johnson vaccine until further information is made available.

**No appointments are needed for first or second doses of the vaccine.**

Individuals should provide ID and insurance information when they arrive to the drive-thru site, and they will remain in the vehicle to receive the vaccine. Those that meet all qualifications but are without insurance are still eligible to receive the vaccine. **While pre-registration is encouraged, it is not required to receive the vaccine.** The goal of LSUHS community vaccine sites is to provide every eligible citizen with access to the vaccine as soon as possible. To preregister, go to the LSU Health Shreveport website at [www.lsuhs.edu](http://www.lsuhs.edu).
