

CONTRACT # 2076-04/21/21

**CITIZENS BLOCK – ENTRANCE ADDITION, EXTERIOR SHELL
28 –34 PARK PLACE, VERNON, CT**

CLARIFICATION

April 21, 2021

We received the following question earlier today: "On Sheet A-510 on Section Detail 5, There is a note that calls out "ALL STEEL COMPONENTS TO BE 316 STAINLESS STEEL, PROPERLY PREPARE, PRIME, AND FINISH PAINT." Stainless steel for these components would be extremely expensive and hard to get especially if the finish will be painted. Please clarify if these components are to be stainless steel or hot dipped galvanized."

Since the period for questions closed on April 14th, we advise all bidders to submit their bids in full accord with the Bid Documents.
