

In accordance with requirements of the Tennessee Department of Health and the policies of Franklin Special School District, all Kindergarten students are required to have **proof of a physical examination** and a valid Tennessee Department of Health “**Certificate of School Immunization.**” This document is available from your child’s healthcare provider who provided your child’s immunizations or from the local health department (you will need to provide a copy of your child’s vaccine record). For students who have **medical or religious vaccine exemptions**, the “Certificate of Immunization” is still required to document the physical examination and the exemptions.

The health department is anticipating that their facility and area pediatricians will be extremely busy in the upcoming few months and are requesting that families go ahead and make appointments as soon as possible for their physical exam and necessary vaccines. If your child is not yet five years old, you should schedule the appointment now for a date on or soon after their fifth birthday.

Additional items required to complete enrollment for Kindergarten students includes completion of the **on-line enrollment** application at www.fssd.org, a copy of the child’s **birth certificate**, and **two proofs of residency**.

All items must be on file for your child to start kindergarten. If you have any questions or need assistance, please contact the school where your child will attend.
