

CENTRAL COMMUNITY SCHOOL SYSTEM

CCSS Grades 6 - 12

What Is It?

The Virtual Academy offers students a flexible learning option that uses today's online technology to maximize one's potential for academic success.

Courses are delivered through a web-based program that is available to students 24/7. Our program can turn your world, or maybe just the corner of your bedroom, into your own customized classroom!

- Every course is fully accredited, and learning progress is monitored by a master teacher to ensure the academy's independent environment is the best fit for you.
- You will receive instruction through a blend of written and visual material, including digital simulations, interactive exercises, scenarios and animated storytelling.
- You will have flexibility to progress at your own pace within the parameters of the semester or grade period. This will allow you time to review materials when needed or the ability to push through materials that are more easily grasped.

How do you get started?

You must fill out an application that is reviewed by a selection committee. An online application and downloadable pdf version of the application are available at <http://virtualacademy.centralcss.org>. The application should be completed and submitted by July 15th. Space is Limited!

It is important that you read the Virtual Academy's policies and procedures to determine if you can comply with the requirements. A copy is available at <http://virtualacademy.centralcss.org>.

Is it right for you?

- Are you a student in grades 6-12 who likes to work on your own?
- Do you follow directions well and consider yourself a self-starter?
- Are you comfortable with writing, working problems and researching online?

If so, then the Virtual Academy may be the right fit for you!

How flexible is it?

The Virtual Academy offers full-time enrollment options for all students in grades 6-12.

- Full-time students can complete all coursework off-campus with the exception of required lab times, orientation and testing.
- Students can also opt to take virtual courses in conjunction with traditional classes at their community school.
- Students are eligible for AP, and Dual Enrollment offerings through BRCC, SELU, or LSU.
