

August 2018

Dear Parents and Guardians:

Attached are your child's Dynamic Learning Maps (DLM) test results from the spring 2018 administration. The Dynamic Learning Maps assessment is a large-scale, standardized achievement test. The DLM Performance Profile and Learning Profile show your child's performance on the DLM assessment.

The Dynamic Learning Maps assessment was administered statewide during the spring of 2018, in English language arts (ELA), mathematics, and science. In a few grades, social studies was also assessed. For grades 3-11, the DLM assessment is designed to compare a student's strengths and needs to clearly defined standards, skill levels, or areas of knowledge. The DLM assessment is aligned with the Wisconsin Essential Elements and measures how students perform in relation to those standards.

As you read your child's Performance Profile and Learning Profile, please refer to explanations on the backside of this letter to assist you in understanding the information. In order to obtain a complete picture of your child's academic performance, daily class work, homework and other learning activities should also be considered.

Please feel free to contact your child's teacher or case manager with any questions. Your child's report will be discussed at their next IEP meeting/parent teacher conference. You may also find more information on our website at mmsd.org/DLM.

Sincerely,

A handwritten signature in black ink that reads "Tim Peterson".

Tim Peterson
Director of Assessment
