

AAPPL Discussion Points

2020-21 Academic School Year

- What does the test indicate as strengths of my student?
- What are areas for improvement?
- What are examples of tasks that students are asked to do for this test?
- Who scores the test?
- Will a score show growth over time?

As with any assessment, this is only one measure of a student's academic performance. It is only through *multiple* assessments (for example, teacher developed assessments, state and district assessments) that we are able to develop a clearer picture of a student's current level of performance as well as their growth over time.

Further information and resources for families and educators about this and all district and state assessments can be found on our website: mmsd.org/assessment
