

Agriculture Business, Research, and Development

The Agriculture Business, Research, and Development course, the fourth course in the CASE program, will serve as the capstone course available to students completing the program. Instruction and continued inquiry-based projects are designed to integrate key learning from previous CASE courses and have students apply them to real-world career situations through Supervised Agricultural Experience (SAE) projects or other internship/ work-based learning opportunities.

Students will be travelling off-site regularly in order to complete their Supervised Agricultural Experience (SAE) projects. The students will need to provide their own transportation.
