

Grants Pass School District
TAG Complaint Procedure

In order to best meet your child's learning needs, your child's teacher will determine how your student's rate and level of learning will be assessed and how the curriculum will be modified for him or her. We encourage you to meet with his or her teacher to provide input into this process. If at any time, you feel this is not meeting your child's rate and level of learning, please contact the classroom teacher. The school principal is also available to assist you and the teacher in seeking appropriate strategies to provide for the needs of your student. Additional support in planning and student advocacy is available through the District TAG Coordinator (474-5709). You may request a form at that number that will allow you to document your concerns relating to TAG services.

If after exhausting the above mentioned resources you feel your child's specific needs are still not being addressed, you may pursuant to Oregon Administrative Rule 581-022-1940, file a complaint with the Office of the Superintendent. District Policy IGBBC-AR outlines the right of a parent to appeal.
